# How to Use This Catalog

Base part number

Semiconductor device

Style description for heat sink

**TO-220 Heat Sinks****7022****Channel style heat sink with folded back fins**

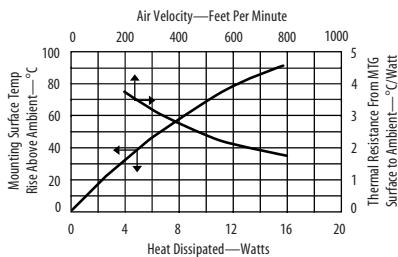

Semiconductor devices have been included in photos to assist in determining mounting position.

Detailed description illustrates the heat sink's differentiating features.

**Channel style heat sink with folded back fins** for increased cooling surface area. Available with tin plated solderable tabs for easy attachment to the printed circuit card.

Thermal graphs show natural and forced convection based on black anodize finish. For information on how to use a thermal graph, please refer to page 11.

Ordering information will specify the base heat sink with available accessories.

## ORDERING INFORMATION

Part Number	Description	Finish	Dia of PCB Plated Thru Hole for Tabs
7022BG	Channel heat sink with folded back fins	Black anodize	
7022PBG	Channel heat sink with folded back fins	Pre-black anodize*	
7022B-MTG	With solderable tabs	Black anodize	2.90 (0.114)
7022PB-MTG	With solderable tabs	Pre-black anodize*	2.90 (0.114)

\* Edges cut during the manufacturing process will be unfinished.  
See page XX for more information

**POPULAR OPTIONS:** 7022B-  G  
Base part no.    A    RoHS Compliant

Position	Code	Description	Location	Details
A	TC11-MT	Insulated device mounting clip for TO-220 and solderable tabs	Hole X	Page

For additional options see page xx

Icons indicate that a mounting kit, grease or epoxy can be used with the heat sink

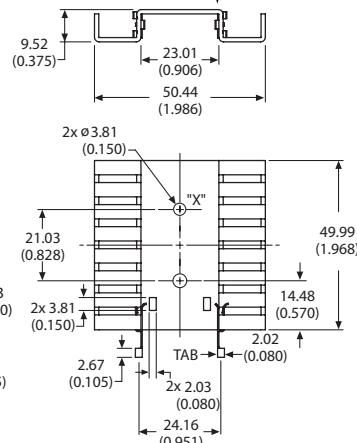

Grease/Epoxy page 112

Mounting Kits page 99

Mechanical drawing dimensions as shown are mm (inches)

Material: 1.27 (0.050) Thick Aluminum  
Finish: See Table

Material and finish information is shown for each part

Aavid has a large selection of popular options to enhance your heat sink selection. This section will indicate the most popular options available.

Detailed indexes are available to select additional options.

**KEY**

H = Horizontal mount

V = Vertical mount

H-V = Either horizontal or vertical depending on device leads

θ<sub>n</sub> = Natural convection thermal resistance based on a 75°C heat sink temperature rise

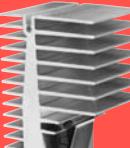

# Index by Device Cooled and Thermal Resistance

## How to select a heat sink

The basic equation for heat transfer or power dissipation may be stated as follows:

$$P_D = \frac{\Delta T}{\Sigma R_\theta}$$

Where:

$P_D$  = the power dissipated by the semiconductor device in watts.

$\Delta T$  = the temperature difference of driving potential which causes the flow of heat.

$\Sigma R_\theta$  = the sum of the thermal resistances of the heat flow path across which  $\Delta T$  exists.

The above relationship may be stated in the following forms:

$$P_D = \frac{T_J - T_A}{R_{\theta JC} + R_{\theta CS} + R_{\theta SA}}$$

$$P_D = \frac{T_C - T_A}{R_{\theta CS} + R_{\theta SA}}$$

$$P_D = \frac{T_S - T_A}{R_{\theta SA}}$$

Where:

$T_J$  = the junction temperature in °C (maximum is usually stated by the manufacturer of the semiconductor device).

$T_C$  = case temperature of the semiconductor device in °C.

$T_S$  = temperature of the heat sink mounting surface in thermal contact with the semiconductor device in °C.

$T_A$  = ambient air temperature in °C.

$R_{\theta JC}$  = thermal resistance from junction to case of the semiconductor device in °C per watt  
(usually stated by manufacturer of semiconductor device).

$R_{\theta CS}$  = thermal resistance through the interface between the semiconductor device  
and the surface on which it is mounted in °C per watt.

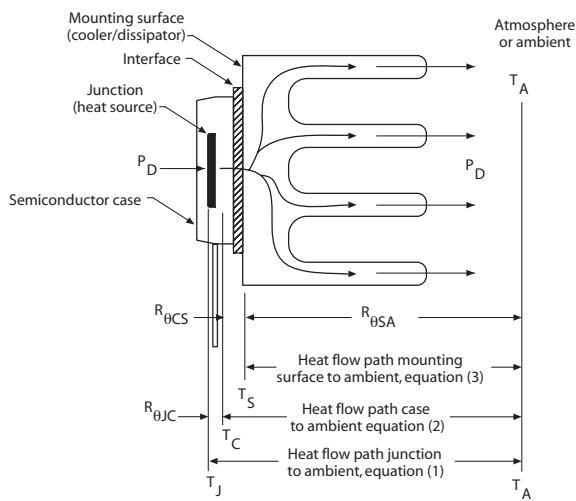

$R_{\theta SA}$  = thermal resistance from mounting surface to ambient or thermal resistance of heat sink in °C per watt.

The above equations are generally used to determine the required thermal resistance of the heat sink ( $R_{\theta SA}$ ), since the heat dissipation, maximum junction and/or case temperature, and ambient temperature are known or set.

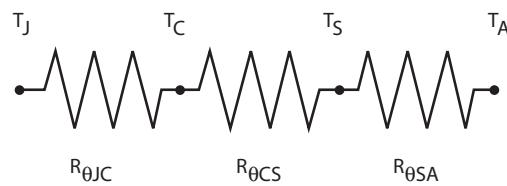

Figure 1 indicates the location of the various heat flow paths, temperatures and thermal resistances.

The common practice is to represent the system with a network of resistances in series as shown in Figure 2.

**FIGURE 1**

**FIGURE 2**

# How To Select a Heat Sink

## Example A

Find a space saving heat sink to keep a TO-220 device below the maximum 150°C junction temperature in natural convection. Device will be screw mounted with an electrically conductive interface.

Given:

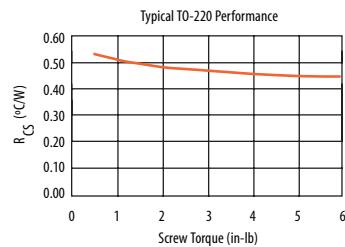

$$P_D = 6 \text{ watts}$$

$R_{\theta JC} = 3^\circ\text{C}/\text{W}$  (from semiconductor manufacturer)

$T_J \text{ max} = 150^\circ\text{C}$  (from semiconductor manufacturer)

$T_A \text{ max} = 65^\circ\text{C}$

A Kondux™ pad is a good choice for electrically conductive applications. Thermal resistance for Kondux™ can be determined from the following graph.

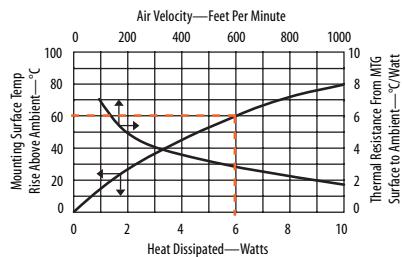

At 2 in-lb of torque the thermal resistance is approximately  $R_{\theta CS} = 0.5^\circ\text{C}/\text{W}$

Using equation 1, solve for  $R_{\theta SA}$

$$R_{\theta SA} = \frac{150 - 65}{6} - (3 + 0.5) = 10.7^\circ\text{C}/\text{W}$$

The Index by Heat Sink Style on page 8 lists space saving heat sinks. Several models are in the 10 °C/W range. Choose the one that best fits the application and verify thermal resistance from graph.

Part number 593202B03500G shows a 60 °C temperature rise at 6 watts.

$$R_{\theta SA} = \frac{60}{6} = 10.0^\circ\text{C}/\text{W}$$

Which meets the above requirement in natural convection.

## Example B

Find a heat sink to keep a TO-220 device below the maximum 150 °C junction temperature in forced convection at 400 ft/min. Device must be electrically insulated and mounted with a labor saving clip.

Given:

$$P_D = 12 \text{ watts}$$

$R_{\theta JC} = 2.5^\circ\text{C}/\text{W}$  (from semiconductor manufacturer)

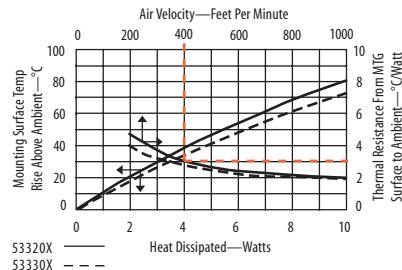

$T_J \text{ max} = 140^\circ\text{C}$  (from semiconductor manufacturer)

$T_A \text{ max} = 50^\circ\text{C}$

A Hi-Flow® pad works great with clip mounting and provides the necessary electrical insulation. Thermal resistance for Hi-Flow® at low pressure is 1.15°C/W (from page 87). Using equation 1, solve for  $R_{\theta SA}$

$$R_{\theta SA} = \frac{140 - 50}{12} - (2.5 + 1.15) = 3.85^\circ\text{C}/\text{W}$$

Many styles are available. If board space is a concern, 533202B02551G (pg 55) meets the requirements.

According to the above graph, an airflow of 400 ft/min results in a thermal resistance of 3°C/W. This is less than the required thermal resistance of 3.85°C/W and is therefore acceptable under these airflow conditions.

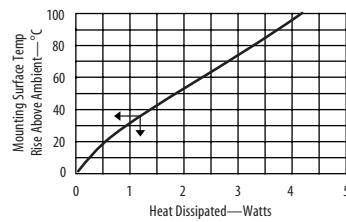

If height is a concern, 533702B02552G would meet the requirements and is only 1.0" tall

Hi-Flow® is a trademark of the Bergquist Company

## Reading a Thermal Performance Graph

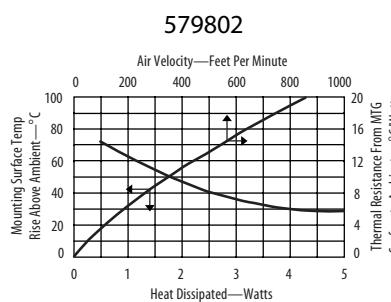

The performance graphs you will see in this catalog (see graph 579802) are actually a composite of two separate graphs which have been combined to save space. The small arrows on each curve indicate to which axis the curve corresponds. Thermal graphs are published assuming the device to be cooled is properly mounted and the heat sink is in its recommended mounting position.

**GRAPH A**

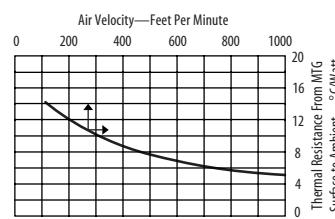

**GRAPH A** is used to show heat sink performance when used in a natural convection environment (i.e. without forced air). This graph starts in the lower left hand corner with the horizontal axis representing the heat dissipation (watts) and the vertical left hand axis representing the rise in heat sink mounting surface temperature above ambient ( $^{\circ}\text{C}$ ). By knowing the power to be dissipated, the temperature rise of the mounting surface can be predicted. Thermal resistance in natural convection is determined by dividing this temperature rise by the power input ( $^{\circ}\text{C}/\text{W}$ ).

**EXAMPLE A:** Aavid Thermalloy part number 579802 is to be used to dissipate 3 watts of power in natural convection. Because we are dealing with natural convection, we refer to graph "A". Knowing that 3 watts are to be dissipated, follow the grid line to the curve and find that at 3 watts there is a temperature rise of  $75^{\circ}\text{C}$ . To get the thermal resistance, divide the temperature rise by the power dissipated, which yields  $25^{\circ}\text{C}/\text{W}$ .

**GRAPH B**

**GRAPH B** is used to show heat sink performance when used in a forced convection environment (i.e. with forced air flow through the heat sink). This graph has its origin in the top right hand corner with the horizontal axis representing air velocity over the heat sink LFM\* and the vertical axis representing the thermal resistance of the heat sink ( $^{\circ}\text{C}/\text{W}$ ). Air velocity is calculated by dividing the output volumetric flow rate of the fan by the cross-sectional area of the outflow air passage.

$$\text{Velocity (LFM)*} = \frac{\text{Volume (CFM)**}}{\text{area (ft}^2\text{)}}$$

**EXAMPLE B:** For the same application we add a fan which blows air over the heat sink at a velocity of 400 LFM. The addition of a fan indicates the use of forced convection and therefore we refer to graph "B". This resistance of  $9.50^{\circ}\text{C}/\text{W}$  is then multiplied by the power to be dissipated, 3 watts. This yields a temperature rise of  $28.5^{\circ}\text{C}$ .

### CONVERTING VOLUME TO VELOCITY

Although most fans are normally rated and compared at their free air delivery at zero back pressure, this is rarely the case in most applications. For accuracy, the volume of output must be derated 60%–80% for the anticipation of back pressure.

**EXAMPLE:** The output air volume of a fan is given as 80 CFM. The output area is 6 inches by 6 inches or  $36 \text{ in}^2$  or  $25 \text{ ft}^2$ . To find velocity:

$$\text{Velocity (LFM)} = \frac{\text{Volume (CFM)}}{\text{area (ft}^2\text{)}}$$

$$\text{Velocity} = \frac{80}{0.25} = 320$$

Velocity is 320 LFM, which at 80%, derates to 256 LFM.

### DESIGN ASSISTANCE

Aavid Thermalloy can assist in the design of heat sinks for both forced and natural convection applications. Contact us for help with your next thermal challenge. For more information, visit our web site at: [www.aavidthermalloy.com](http://www.aavidthermalloy.com)

# BGA-Solder Anchor

## Solder anchor attachment

Aavid's unique Solder anchor attachment method uses two or four small Solder anchors attached to the circuit card and a wire spring clip to securely fasten the heat sink to the device. This method is rugged, compact and allows for easy removal in case of rework.

All products include a phase change pad suitable for most IC package styles to optimize thermal performance. Models are available with a single or dual spring clips for additional thermal interface pressure. Solder anchors are ordered separately.

## BGA-Push Pin Attachment

### Push pin attachment

Push pin heat sinks require two 3.10mm holes in the circuit card to quickly attach the heat sink over the device. The one piece design makes assembly a snap. Pressure is maintained by the tension of the push pin coil springs to ensure even pressure across the device. Push pins provide a greater margin of reliability in applications where gravity or vibration may cause tapes or adhesives to fail. The addition of a phase change pad optimizes thermal performance.

## BGA-Tape Attachment

### Heat sinks for plastic BGA packages

Pressure sensitive, thermally conductive adhesive tape easily and reliably bonds a heat sink to an integrated circuit package. Tapes provide high thermal conductivity and exceptional bonding properties. Adhesives are formulated for plastic and metal/ceramic packages.

Material: Aluminum

# BGA-Clip Attachment

## Clip attachment

Aavid's BGS Clip heat sinks provide a mechanical attachment alternative to tape applications where it is desirable to attach the heat sink directly to the device. The unique clip uses spring pressure to ensure even contact across the device while the end plates firmly engage the edge of the package, locking the heat sink in place. Each heat sink uses pre-applied thermal grease for optimum thermal performance.

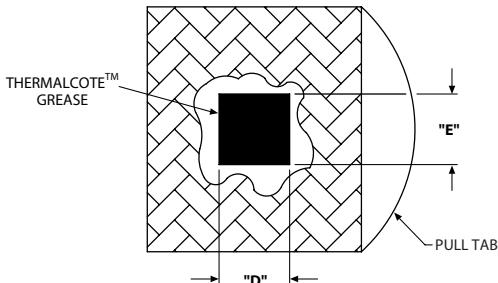

Material: Aluminum  
Finish: Black Anodize

## DIPS

**5801****Slide on heat sink with staggered fins**

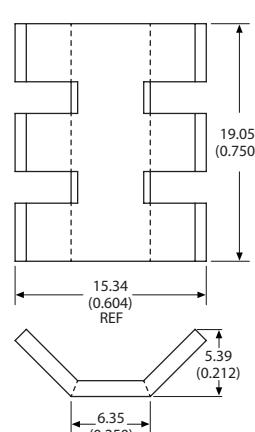

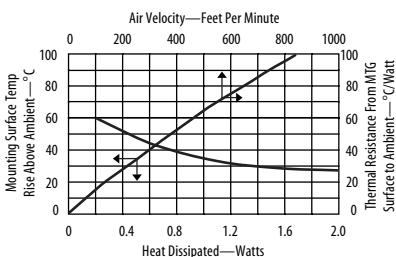

**Slide on heat sink with staggered fins** attaches to 8 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces. Available in two finishes.

**ORDERING INFORMATION**

Part Number	Finish
580100B00000G	Black anodize
580100W00000G	Black anodize with black paint on bottom side

**5010****Angle fin heat sink**

**Angle fin heat sink** is a simple low cost solution for cooling DIP devices. Suitable for 14 and 16 pin packages and available in two finish options. Easily attaches using thermal epoxy.

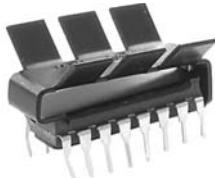

Material: 1.27 (0.050) Thick Aluminum  
Finish: See Table

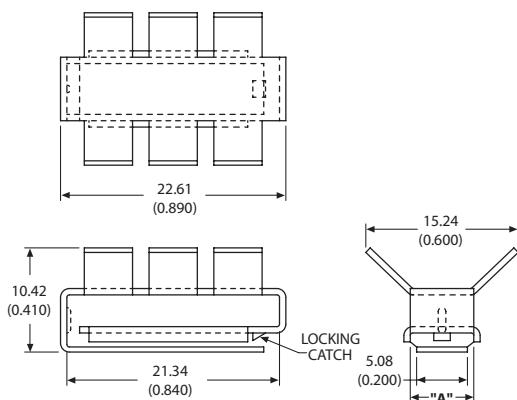

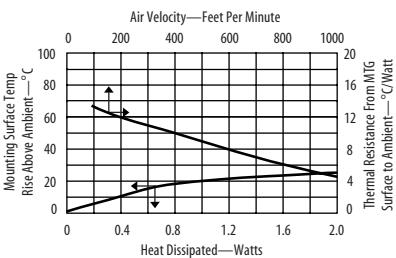

**ORDERING INFORMATION**

Part Number	Finish
501000J00000G	Pre black anodize*
501000B00000G	Black anodize

\* Edges cut during the manufacturing process will be unfinished.  
See page 110 for more information.

**5602, 5802 Slide on heat sink with angled fins**

**Slide on heat sink with angled fins** attaches to 14 and 16 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces. Available in two finishes.

Material: 0.63 (0.025) Thick Aluminum  
Finish: See Table

**ORDERING INFORMATION**

Part Number	Device Pkg Style	Finish	"A" Dim
560200B00000G	Ceramic	Black anodize	7.87 (0.310)
560200W00000G	Ceramic	Black anodize with black paint on bottom side	7.87 (0.310)
580200B00000G	Plastic	Black anodize	6.35 (0.250)
580200W00000G	Plastic	Black anodize with black paint on bottom side	6.35 (0.250)

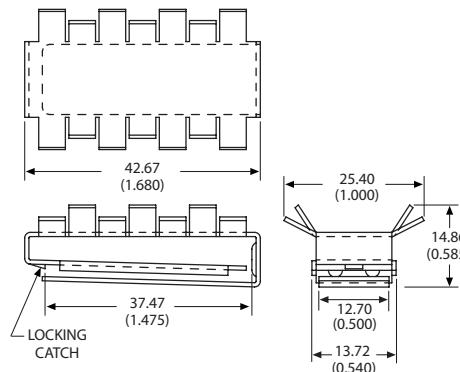

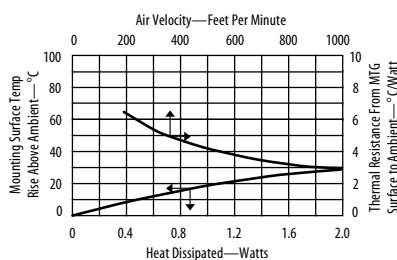

Material: 0.63 (0.025) Thick Aluminum  
Finish: See Table

5806

## Slide on heat sink with staggered fins

**Slide on heat sink with staggered fins** attaches to 28 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

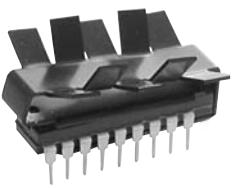

## ORDERING INFORMATION

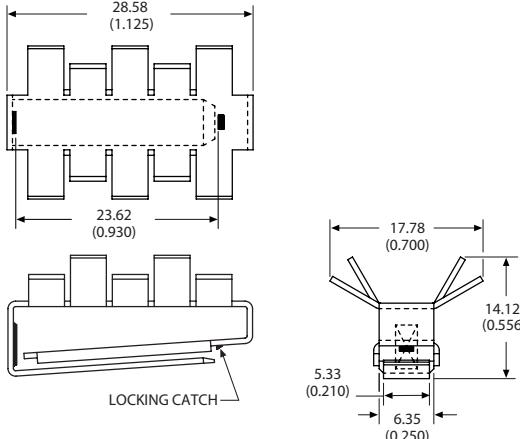

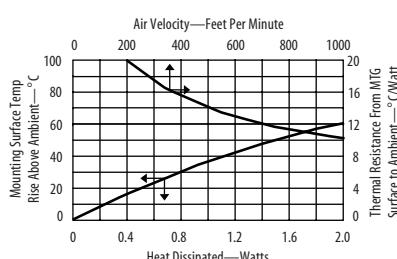

Part Number	Description
580600B00000G	Slide on heat sink with staggered fins

5803

## Slide on heat sink with staggered fins

**Slide on heat sink with staggered fins** attaches to 18 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

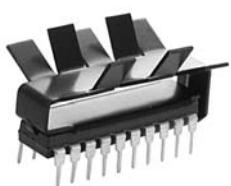

## ORDERING INFORMATION

Part Number	Description
580300B00000G	Slide on heat sink with staggered fins

## DIPS

5804

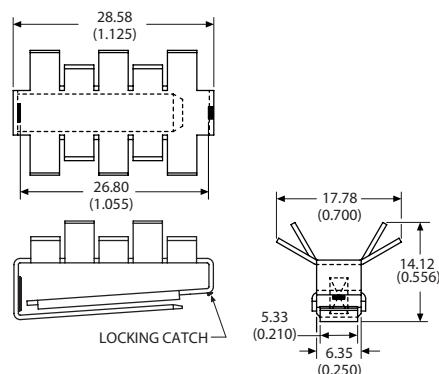

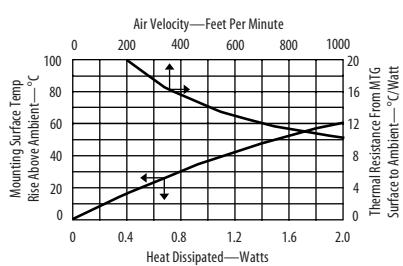

## Slide on heat sink with staggered fins

**Slide on heat sink with staggered fins** attaches to 20 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

## ORDERING INFORMATION

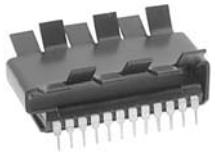

Part Number	Description
580400B00000G	Slide on heat sink with staggered fins

Finish: Black Anodize

5805

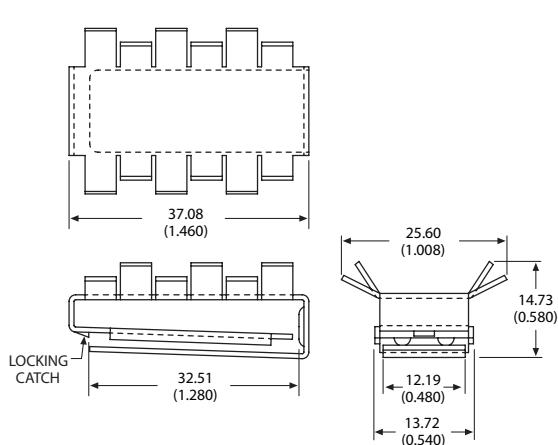

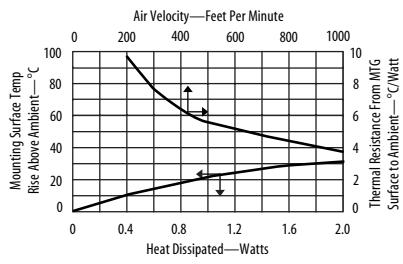

## Slide on heat sink with staggered fins

**Slide on heat sink with staggered fins** attaches to 24 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

## ORDERING INFORMATION

Part Number	Description
580500B00000G	Slide on heat sink with staggered fins

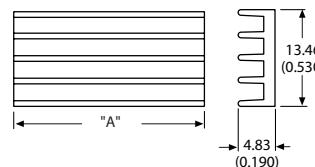

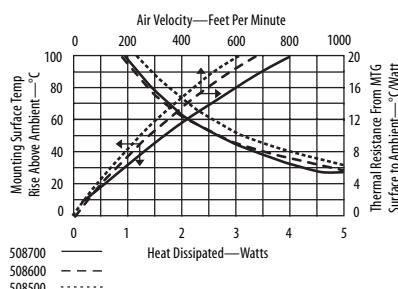

Material: 0.81 (0.032) Thick Aluminum  
Finish: Black Anodize

DIPS

**5085, 5086, 5087****Extruded epoxy attach on heat sink with straight fins**

**Extruded epoxy attach on heat sink**  
with straight fins attaches to 24, 28, and 40 pin DIP packages quickly and easily. May be added before or after final board assembly. No additional board space is required.

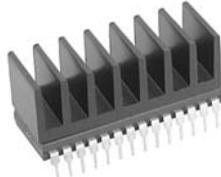

Material: Aluminum  
Finish: Black Anodize

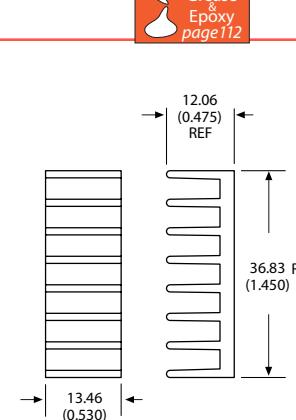

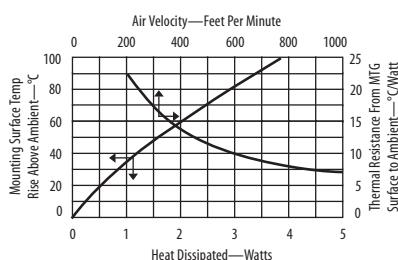

**ORDERING INFORMATION**

Part Number	DIP Package	"A" Dim
508500B00000G	24 pin	31.75 (1.250)
508600B00000G	28 pin	36.83 (1.450)
508700B00000G	40 pin	50.80 (2.000)

For epoxy information see pages 114-115.

**6284****Extruded epoxy attach heat sink**

**Extruded epoxy attach heat sink**  
which requires no additional board space is suitable for narrow DIP packages. May be added before or after final board assembly. No additional board space is required.  
Attaches to 28 pin DIP.

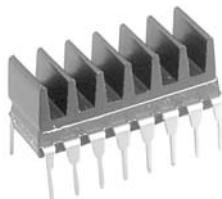

Material: Aluminum  
Finish: Black Anodize

**ORDERING INFORMATION**

Part Number	Description
6284BG	Extruded epoxy attach heat sink for 28 pin DIP

For epoxy information see pages 114-115.

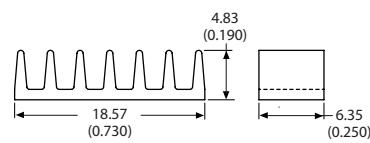

**5011, 5012****Extruded epoxy attach heat sink with straight fins**

**Extruded epoxy attach heat sink with straight fins** attaches to 14 and 16 pin DIP packages quickly and easily. May be added before or after final board assembly. No additional board space is required.  
Available in two fin directions.

**Surface mount heat sink for D-PAK (TO-252) package semiconductors** remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

#### ORDERING INFORMATION

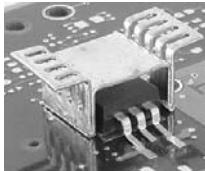

Part Number	Packaging
573100D00010G	13" Reel, 250 per reel
573100D00000G	Bulk, 500 per bag

See page 25 for tape and reel information

Refer to Figure A and B on page 26 for board footprint information

## 5733 Surface mount heat sink for D<sup>2</sup>PAK (TO-263) package semiconductors

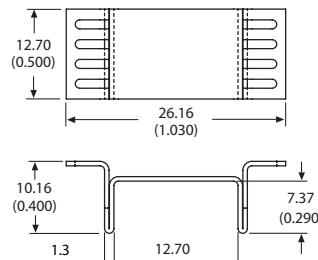

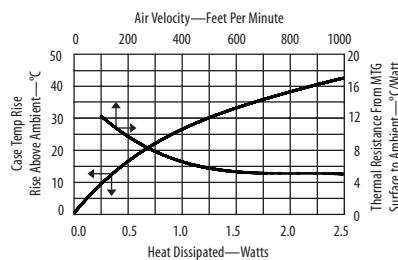

**Surface mount heat sink for D<sup>2</sup>PAK (TO-263) package semiconductors** remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

#### ORDERING INFORMATION

Part Number	Packaging
573300D00010G	13" Reel, 250 per reel
573300D00000G	Bulk, 500 per bag

See page 25 for tape and reel information

Material: 0.63 (0.025) Thick Copper  
Finish: Tin Plated

Refer to Figure A and B on page 26 for board footprint information

## 7106 Surface mount heat sink for D<sup>2</sup>PAK (TO-263), power SO-10 (MO-184) and SO-10 package semiconductors

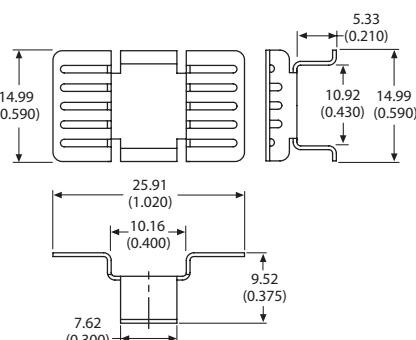

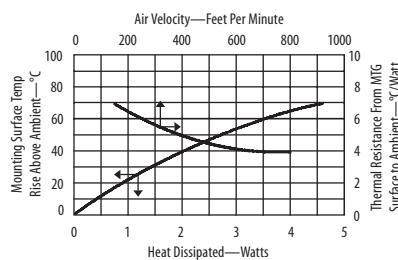

**Surface mount heat sink for D<sup>2</sup>PAK (TO-263), power SO-10 (MO-184) and SO-10 package semiconductors** remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

#### ORDERING INFORMATION

Part Number	Packaging
7106D/TRG	13" Reel, 200 per reel
7106DG	Bulk, 500 per bag

See page 25 for tape and reel information

Material: 0.63 (0.025) Thick Copper  
Finish: Tin Plated

Refer to Figure C on page 26 for board footprint information

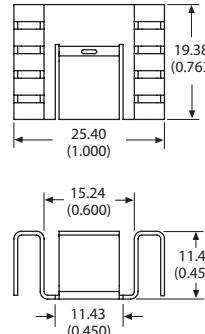

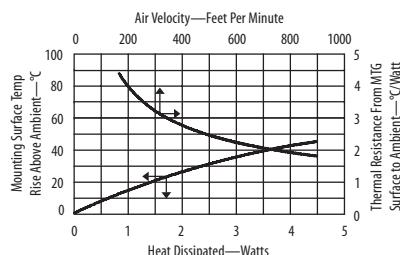

**7109 Surface mount heat sink for D<sup>2</sup> PAK (TO-263) package semiconductors**

**Surface mount heat sink for D<sup>2</sup> PAK (TO-263) package semiconductors**  
remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

**ORDERING INFORMATION**

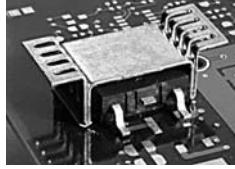

Part Number	Packaging
7109D/TRG	13" Reel, 125 per reel
7109DG	Bulk, 500 per bag

See below for tape and reel information

Refer to Figure D on page 26 for board footprint information

Material: 0.63 (0.025) Thick Copper  
Finish: Tin Plated

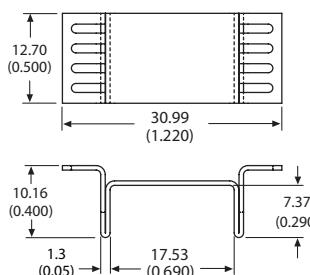

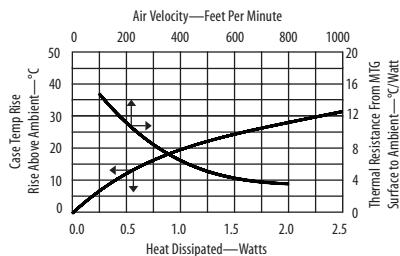

**5734 Surface mount heat sink for D<sup>3</sup> PAK (TO-268) package semiconductors**

**Surface mount heat sink for D<sup>3</sup> PAK (TO-268) package semiconductors**  
remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

**ORDERING INFORMATION**

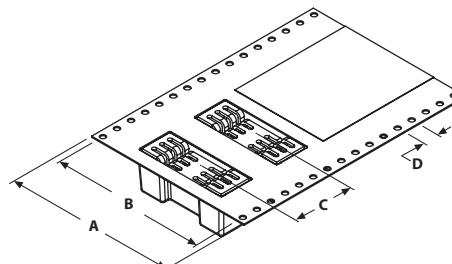

Part Number	Packaging
573400D00010G	13" Reel, 250 per reel
573400D00000G	Bulk, 500 per bag

See below for tape and reel information

Refer to Figure A and B on page 26 for board footprint information

Material: 0.63 (0.025) Thick Copper  
Finish: Tin Plated

## TO-220 Heat Sinks

## 7128 Copper channel style heat sink with integrated clip

**Copper channel style heat sink with integrated clip and locking tab** for secure attachment to the device. Narrow profile uses less board space. Includes tin plated solderable tabs for easy attachment to the printed circuit card.

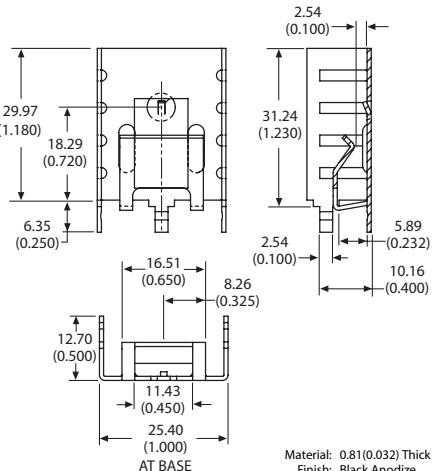

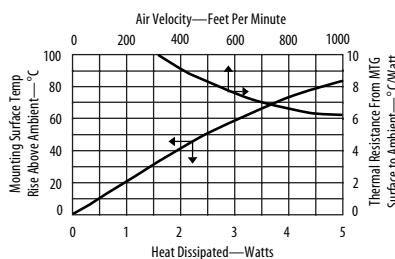

## ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
7128DG	Slide on channel heat sink with integrated clip and locking tabs	2.92 (0.115)

## 6038 Channel style heat sink with integrated clip

**Channel style heat sink with integrated clip and locking tab** for secure attachment to the device. Tabs can be bent for mounting.

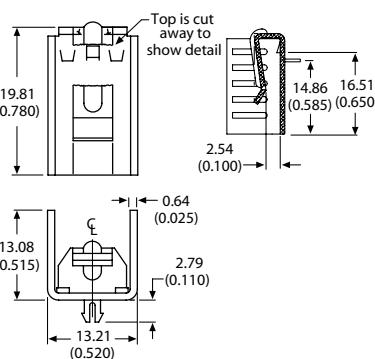

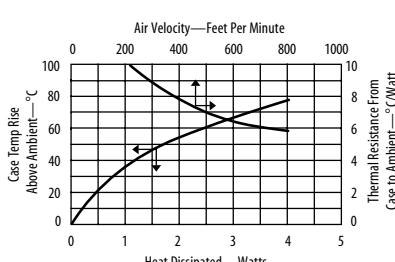

## ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
6038BG	Slide on channel heat sink with integrated clip and locking tabs	3.81 (0.150)

## 7142 Narrow channel style heat sink with integrated clip

**Narrow channel style heat sink with integrated clip and locking tab** for secure attachment to the device. Device can be mounted horizontally using a single center tab that can be soldered directly to the PC board.

## ORDERING INFORMATION

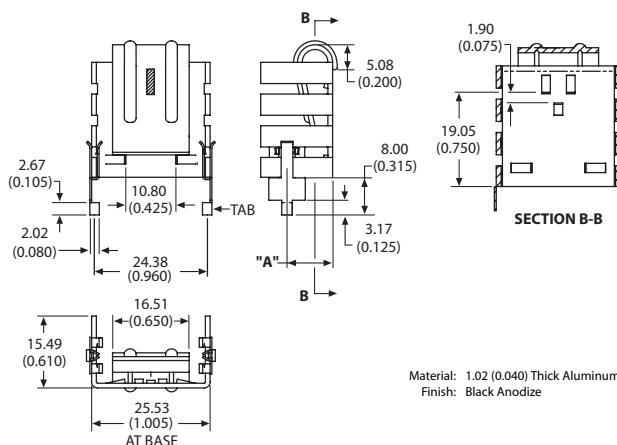

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
7142DG	Slide on narrow channel heat sink with integrated clip and locking tabs	3.18 (0.125)

## 6238, 6239 Channel style heat sink with integrated clip

**Channel style heat sink with integrated clip** features strong spring tension and device locking tab to attach device securely to the heat sink. Available with solderable tabs for vertical mount or without tabs for mounting horizontally.

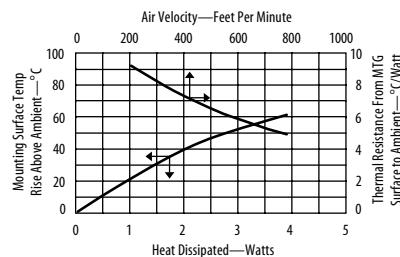

Material: 1.02 (0.040) Thick Aluminum  
Finish: Black Anodize

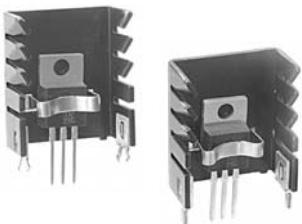

## ORDERING INFORMATION

Part Number	Description	"A" Dim	Dia of PCB Plated Thru Hole for Tabs
6238BG	Channel heat sink with integral clip, no solderable tab		
6238B-MTG	With solderable mounting tabs	10.16 (0.400)	2.90 (0.114)
6239B-MTG	With solderable mounting tabs	6.99 (0.275)	2.90 (0.114)

For additional options see page 85

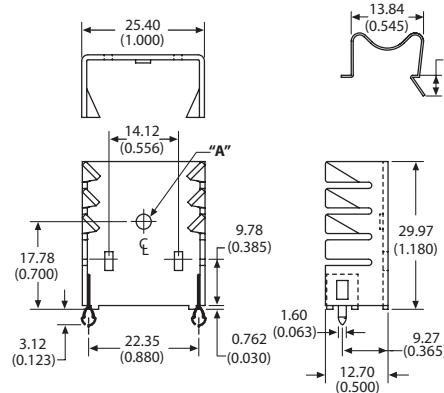

## 5342 Channel style heat sink with convenient clip

**Channel style heat sink features a dittin to locate the device and a convenient clip** to eliminate the need for mounting hardware. The twisted fins increase cooling efficiency. Available in two solderable mounting tab styles. Can be ordered without the dittin if electrical isolation is required or for mounting tableless packages.

For additional options see page 82

## TO-220 Heat Sinks

7141

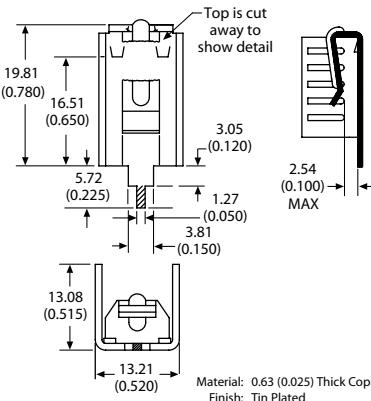

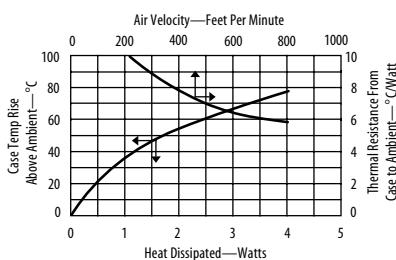

Copper narrow channel style heat sink with integrated clip

**Copper narrow channel style heat sink with integrated clip and locking tab** for secure attachment to the device. Single center tab can be soldered directly to the PC board.

## ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
7141DG	Narrow channel heat sink with integrated clip	2.77 (0.109)

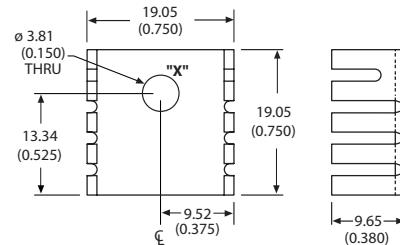

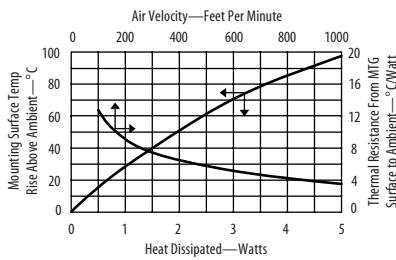

5073

Economy, narrow base, low profile channel style heat sink

**Economy, narrow base, low profile channel style heat sink** is perfect for use on printed circuit boards with 0.500 inch centering. When mounted horizontally, the total height of the heat sink is just 0.380.

Material: 1.27 (0.050) Thick Aluminum Finish: See Table

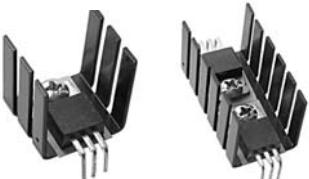

## ORDERING INFORMATION

Part Number	Finish			
507302B00000G	Black anodize			
507302J00000G	Pre-black anodize*			
* Edges cut during the manufacturing process will be unfinished. See page 110 for more information				
POPULAR OPTIONS: 507302 - 000 00G

# TO-220 Heat Sinks

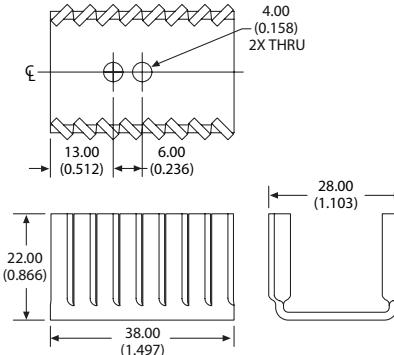

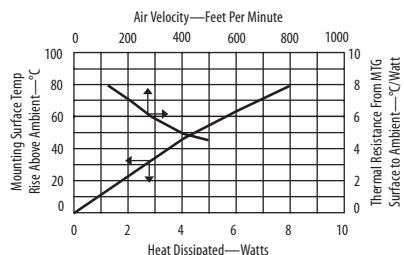

**TV40**

Narrow channel style heat sink features twisted fins

**Narrow channel style heat sink features twisted fins**  
for increased air turbulence and better cooling. Mounts horizontally to accommodate two TO-220 devices.

Material: 0.81 (0.032) Thick Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

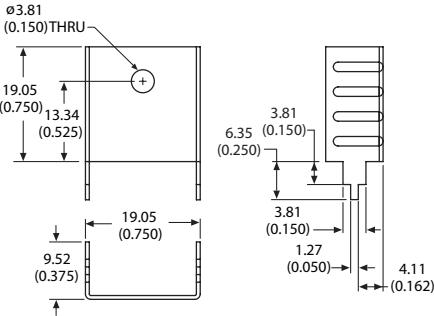

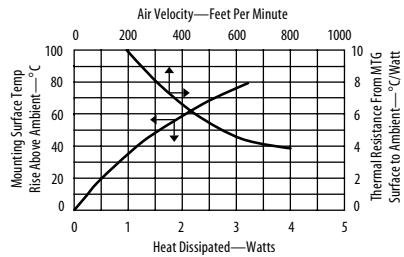

Part Number	Description
TV40G	Narrow channel style heat sink with twisted fins

**7173**

Copper channel style heat sink featuring two integrated tabs

**Copper channel style heat sink features two integrated tabs.**  
The heat sink is tin plated and can be soldered to the PC board.

Material: 0.63 (0.025) Thick Copper  
Finish: Tin Plated

## ORDERING INFORMATION

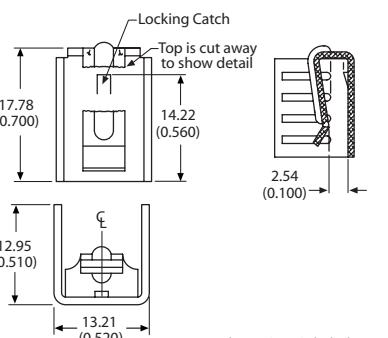

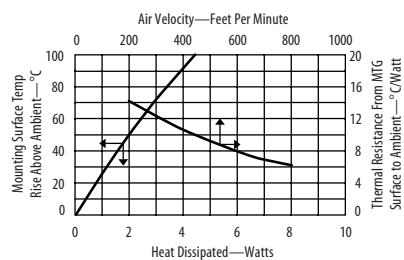

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
7173DG	Copper channel style heat sink	2.54 (0.100)

**6236**

Channel style heat sink featuring an integrated device retaining clip

**Channel style heat sink features an integrated device retaining clip**  
that eliminates the need for attachment hardware. Available in two finish options.

Material: 1.02 (0.040) Thick Aluminum  
Finish: See Table

## ORDERING INFORMATION

Part Number	Finish
6236BG	Black anodize
6236PBG	Pre-black anodize*

\* Edges cut during the manufacturing process will be unfinished.  
See page 110 for more information.

## TO-220 Heat Sinks

5306, 5307, 5760

Channel style heat sink with wide mounting surface

**Lightweight, low cost channel style heat sink** with wide mounting surface and selection of lengths to accept a variety of packages. Models accomodate one or two devices.

## ORDERING INFORMATION

Part Number	Figure	"A" Dim	"B" Dim	"C" Dim

# TO-220 Heat Sinks

## 5069, 5070, 5071, 5072 Hat section style heat sink

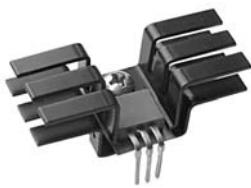

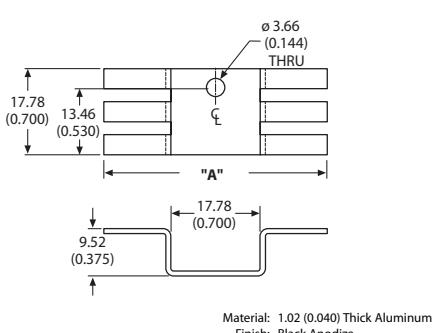

FIGURE A

**Hat section style heat sinks** are low profile and perfect for use on printed circuit cards with 0.500 inch centering between boards. For higher power applications the 5071 hat can be added to the 5070 or 5072 for double sided cooling of a TO-220 device.

### ORDERING INFORMATION

Part Number	Description	Figure	"A" Dim
506902B00000G	Hat section heat sink	A	31.75 (1.250)

## TO-220 Heat Sinks

### PF750, PF758 Slip on heat sink featuring integrated tabs

**Slip on heat sink** is tin plated and has integrated tabs for soldering to the PC board. Locating features provide simple device alignment and spring action holds the device for good thermal contact.

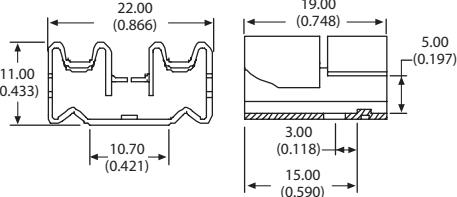

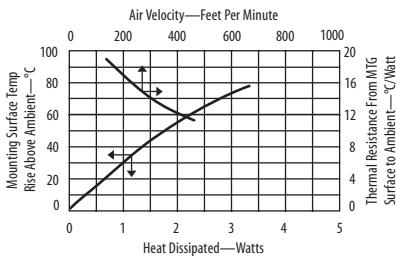

#### ORDERING INFORMATION

Part Number	Description	"A" Dim	"B" Dim
PF750G	Slip on heat sink with tabs	19.00(0.748)	3.00(0.118)
PF758G	Slip on heat sink with tabs	24.00(0.945)	5.20(0.205)

### PF752 Slip on heat sink

**Slip on heat sink** has locating features for simple device alignment. Spring action holds the device for good thermal contact.

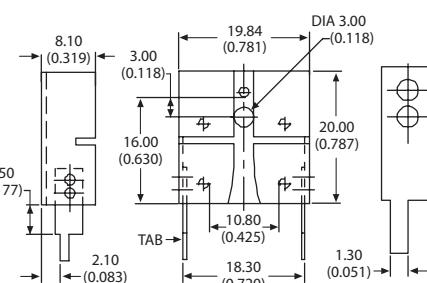

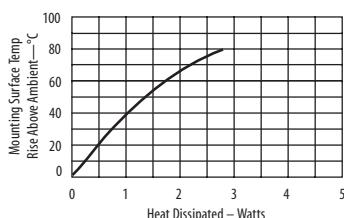

#### ORDERING INFORMATION

Part Number	Description
PF752G	Slip on heat sink

### PF720, PF723 Slip on heat sink

**Slip on heat sink** has locating features for simple device alignment. Spring action holds the device for good thermal contact. Available with or without solderable mounting tabs

#### ORDERING INFORMATION

Part Number	Description
PF720G	Slip on heat sink, no solderable tabs
PF723G	With solderable tabs

\* Edges cut during manufacturing process will be unfinished

# TO-220 Heat Sinks

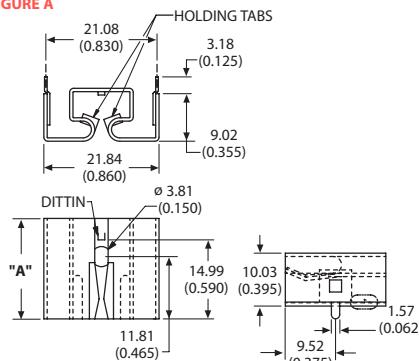

**5744, 5745, 5746, 5749** Low cost, labor saving, slide on heat sink featuring spring action

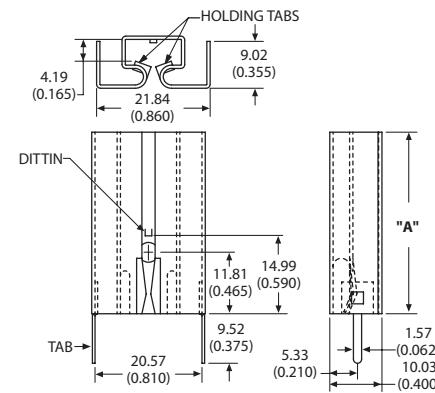

**Low cost, labor saving, slide on heat sink features spring action** to firmly hold the device tab to the heat sink providing maximum metal to metal contact and good thermal conduction. Available with solderable tabs for horizontal or vertical mounting to the PC board.

FIGURE A

Material: 0.63 (0.025) Thick Aluminum  
Finish: Black Anodize

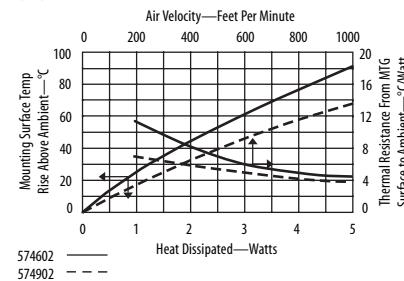

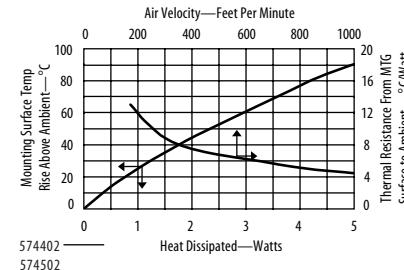

FIGURE B

**5741**

Low cost, labor saving, slide on heat sink featuring spring action

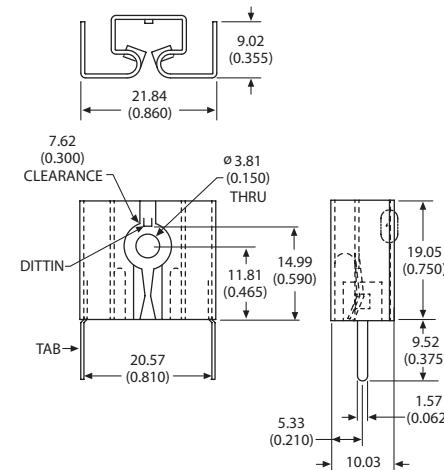

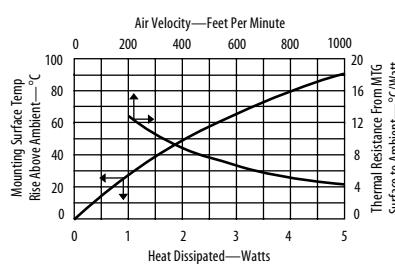

**Low cost, labor saving, slide on heat sink features spring action** to firmly hold the device tab to the heat sink providing maximum metal to metal contact and good thermal conduction. Includes a clearance hole in the top side to allow the use of optional hardware to attach device and heat sink to circuit board or other surface. Also available with solderable tabs for vertical mounting to the PC board.

## ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
574102B00000G	Low cost slide on heat sink, no solderable tabs

PF432G	Plug in style heat sink with solderable tab, vertical mount	A	6.20 (0.244)	1.60 (0.063)
PF433G	With vertical mount no tab	A		
PF434G	With solderable tab, horizontal mount	B		1.60 (0.063)
PF435G	With solderable tab, vertical mount	A	9.50 (0.374)	1.60 (0.063)
PF436G	With solderable tab offset from center, horizontal mount	C		1.60 (0.063)

\*Edges cut during the manufacturing process will be unfinished.

See page 110 for more information

# TO-220 & TO-262 Heat Sinks

5669

Plug in style heat sink with folded back fins

FIGURE A

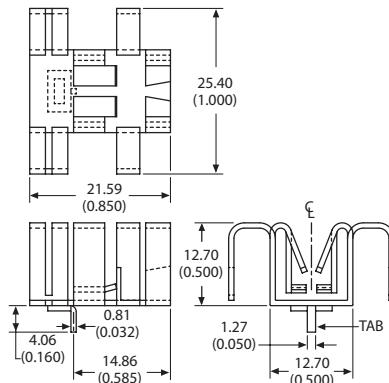

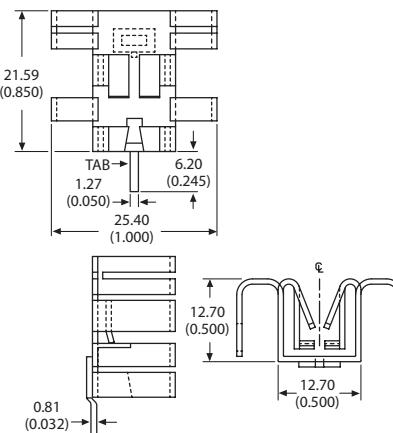

FIGURE B

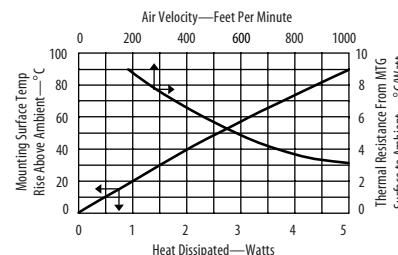

Material: 0.81 (0.032) Thick Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

Part Number	Description	Figure	Dia of PCB Plated Thru Hole for Tabs
566902B00000G	Plug in style heat sink with no mounting tab	A	
566902B03100G	With horizontal mounting tab	A	1.73 (0.068)
566902B04000G	With vertical mounting tab	B	1.75 (0.069)

For additional options see page 82

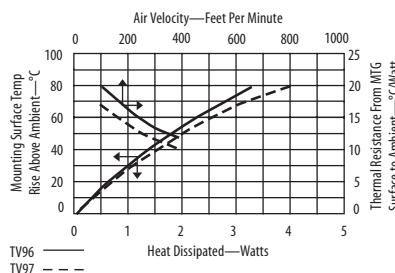

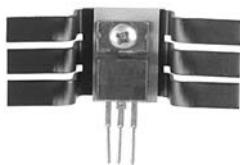

# TO-220 & TO-218 & TO-247 Heat Sinks

TV96, TV97 Hat section heat sink with twisted fins

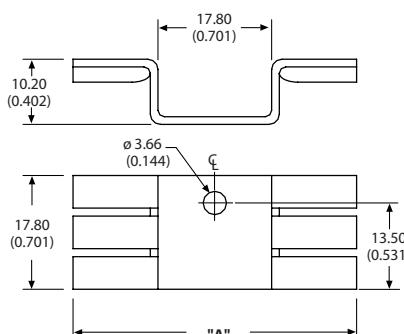

Grease & Epoxy page 112

Hat section heat sink with twisted fins is low profile and perfect for use on circuit cards with 0.500 spacing. The twisted fins increase air turbulence for better thermal performance.

## ORDERING INFORMATION

Part Number	"A" Dim
TV96G	31.70 (1.248)
TV97G	44.40 (1.748)

Material: 0.99 (0.039) Thick Aluminum  
Finish: Black Anodize

## TO-220 &amp; TO-218 &amp; TO-247 Heat Sinks

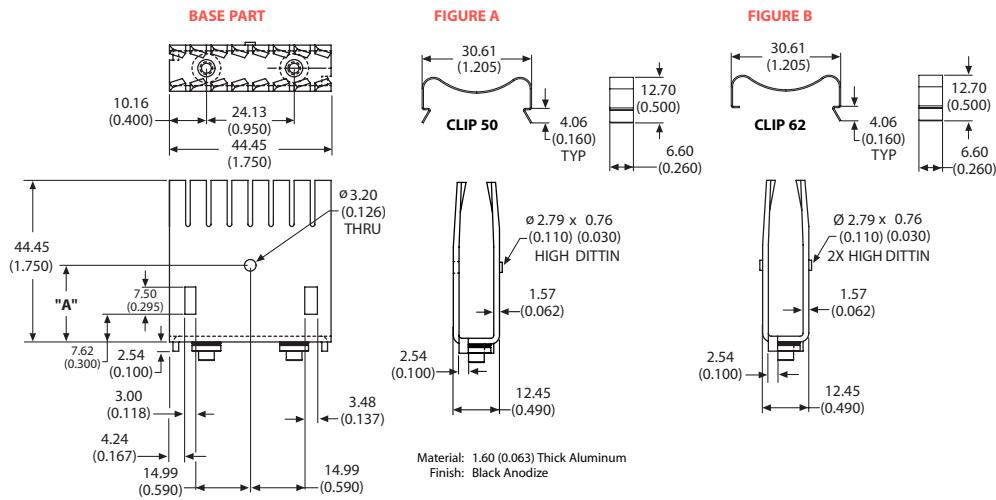

## 5301 High rise style heat sink features twisted fins and Wave-On™ solderable mounts

Grease & Epoxy page 112    Mounting Kits page 99

**High rise style heat sink features twisted fins and Wave-On™ solderable mounts** for easy attachment to the PC card. Models include thru holes on one side to attach devices using standard hardware and dittins with special slots on the other for easy device attachment using a convenient spring clip. Dual models use two dittins and clips to locate and attach devices.

## ORDERING INFORMATION

Part Number	Description	Device	Figure	"A" Dim	Dia of PCB Plated Thru Hole for Tabs
530101B00100G	Heat sink twisted fin	TO-218, TO-247		21.08 (0.830)	4.75 (0.187)

## TO-220 &amp; TO-218 &amp; TO-247 &amp; Multiwatt Heat Sinks

6396, 6398, 6399, 6400 High power extruded heat sink with large radial fins

**High power extruded heat sink with large radial fins and solderable shoulder pins** allows vertical mounting without stress on the device leads. Available with shoulder pins to provide fixed clearance between the bottom of the heat sink and the board. Available in four heights for TO-220, TO-218, TO-247 and multiwatt devices.

## TO-218 Heat Sinks

## 5922 Plug in style heat sink

**Plug in style heat sink requires no hardware** to attach to the device. The four spring action clips apply even pressure eliminating gaps between the heat sink and device which rob thermal performance.

Material: 1.27 (0.050) Thick Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

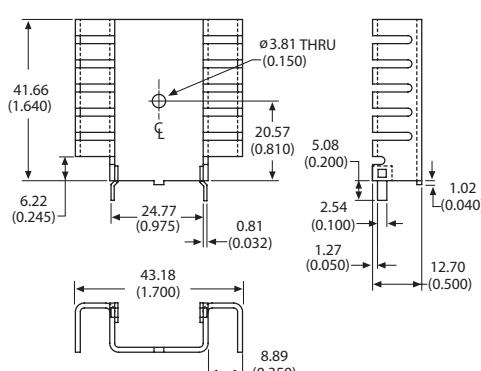

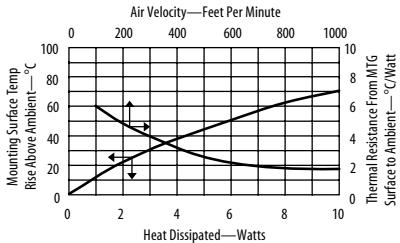

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
592201B03400G	High power plug in heat sink with folded back fins and solderable mounting tabs	2.39 (0.094)

For additional options see page 82

## 5931 Channel style heat sink with folded back fins

**Channel style heat sink with folded back fins** for extra cooling capacity. The heat sink features solderable tabs for easy attachment to the PC board.

Material: 1.27 (0.050) Thick Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

## 5305 Channel style heat sink with integrated clip

**Channel style heat sink with integrated clip** features strong spring tension and device locking catch to attach device securely to the heat sink. Available in two finishes.

Material: 0.81 (0.032) Thick Aluminum  
Finish: See Table

## ORDERING INFORMATION

Part Number	Finish
530510U00000G	Unfinished
530510B00000G	Black anodize

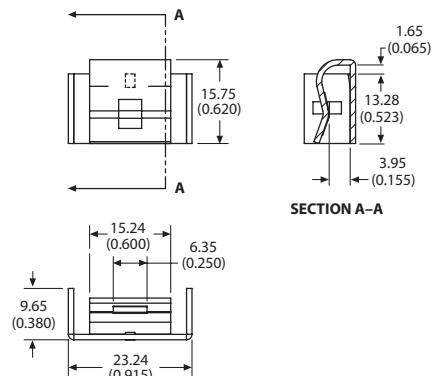

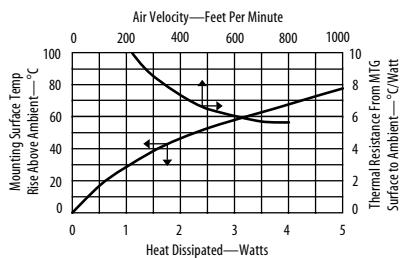

## 7038 Channel style slide on heat sink featuring an integrated clip and device retaining tab

**Channel style slide on heat sink** features an integrated clip and device retaining tab to hold the heat sink to the device. Small footprint consumes less board space.

### ORDERING INFORMATION

Part Number	Description
7038BG	Channel style slide on heat sink

Material: 0.81 (0.032) Thick Aluminum  
Finish: Black Anodize

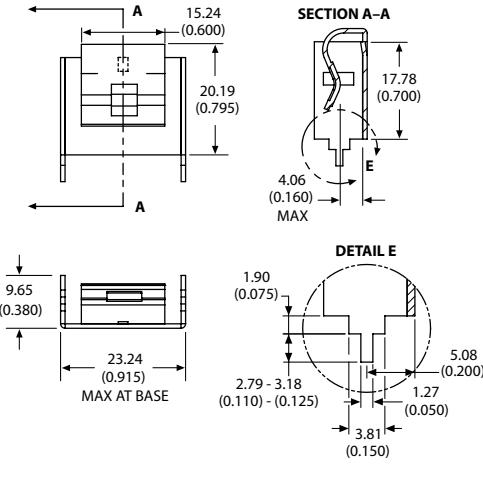

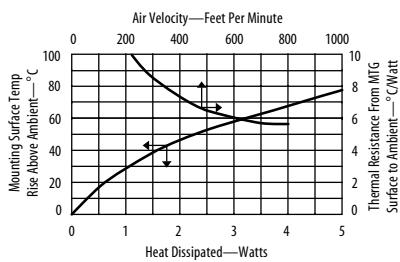

## 7148 Copper channel style slide on heat sink featuring an integrated clip and solderable tabs

**Copper channel style slide on heat sink** features an integrated clip and solderable tabs. Includes a device retaining tab to securely hold the heat sink to the device. Small footprint consumes less board space.

### ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
7148DG	Slide on heat sink with integrated clip	2.54 (0.100)

Material: 0.81 (0.032) Thick Copper  
Finish: Tin Plated

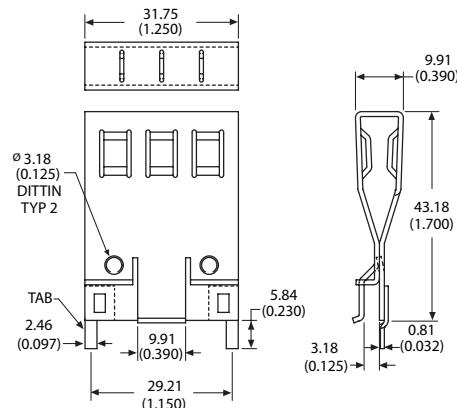

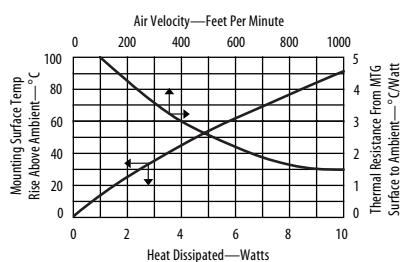

## 5840 Clip on heat sink featuring louvers

**Clip on heat sink features louvers** to provide excellent cooling in natural or forced air convection. Spring action provides strong clamping force to securely hold the heat sink to the device. Available with or without solderable tabs.

### ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
584000B00000G	Clip on heat sink, no solderable tabs	
584000B03500G	With solderable tabs for vertical mounting	2.84 (0.112)

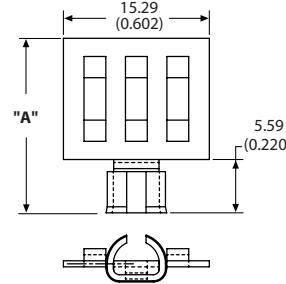

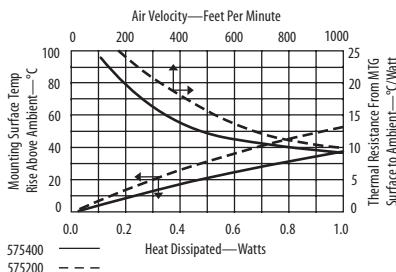

Material: 1.02 (0.040) Thick Aluminum  
Finish: Black Anodize

## TO-92 Heat Sinks

**5752, 5753, 5754 Low cost slip on heat sink**

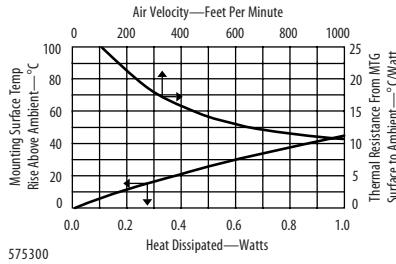

**Low cost slip on heat sink**  
features an expandable collar that tightly grips the device meaning no extra mounting hardware is required. Three heights to choose from.

Material: 0.63 (0.025) Thick Aluminum  
Finish: Black Anodize

### ORDERING INFORMATION

Part Number	"A" Dim
575200B0000G	18.29 (0.720)
575300B0000G	24.64 (0.970)
575400B0000G	30.99 (1.220)

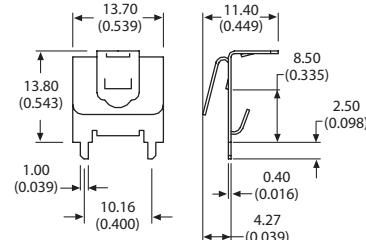

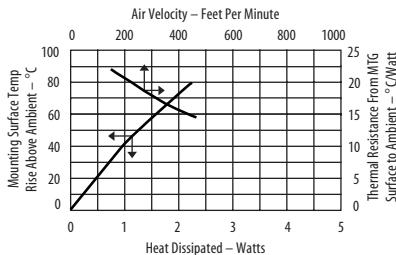

**92F**

**Low cost brass clip on heat sink**

**Low cost brass clip on heat sink**  
requires no hardware to attach to the device. Includes integrated tabs that can be soldered or twisted to attach the heat sink to the board reducing stress on the device leads.

Material: 0.38 (0.015) Thick Brass  
Finish: Unfinished

### ORDERING INFORMATION

Part Number	Description	Dia of PCB Plated Thru Hole for Tabs
92FG	Brass clip on heat sink	1.73 (0.068)

## TO-3 Heat Sinks

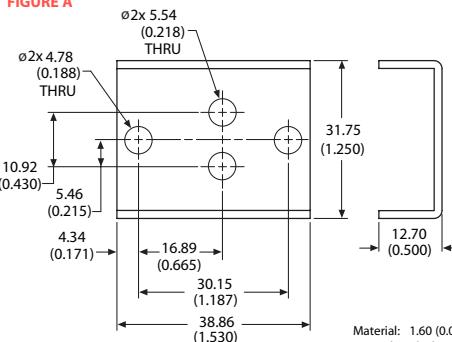

## 5203 Two piece heat sink

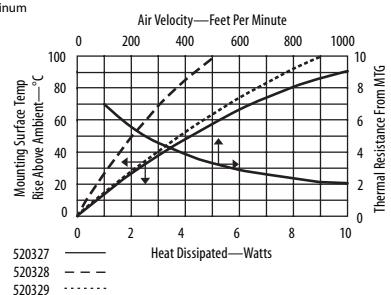

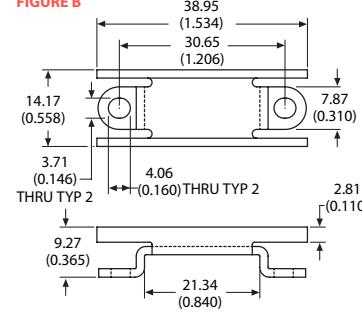

**Two piece heat sink** adds extra cooling in the same amount of board space as other solutions. Base and top can be ordered separately.

FIGURE A

Material: 1.60 (0.063) Thick Aluminum  
Finish: Black Anodize

FIGURE B

## ORDERING INFORMATION

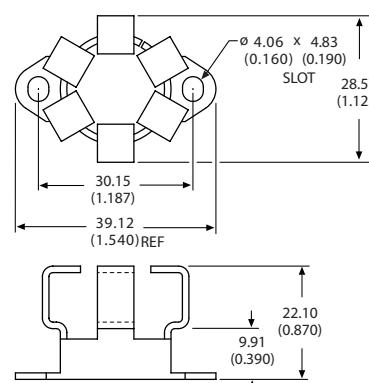

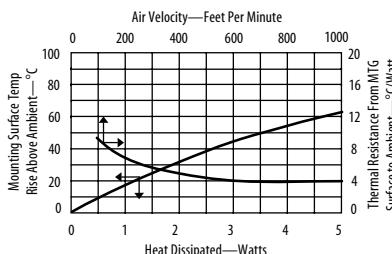

Part Number	Description	Figure
520327B00000G	Two piece heat sink assembly, base and top	
520328B00000G	Top only	B
520329B00000G	Base only	A

For additional options see page 84

## 5791 Space saving expandable collar heat sink

**Space saving expandable collar heat sink** has the same footprint as the device being cooled meaning no extra board space is required to fit the heat sink. The expandable collar tightly grips the device meaning no extra hardware is required. May also be used with any diamond or square basket heat sink to form a two piece heat sink for additional cooling. Available in conductive AavSHIELD<sup>3</sup> or black anodize finish.

Material: 1.27 (0.050) Thick Aluminum  
Finish: See Table

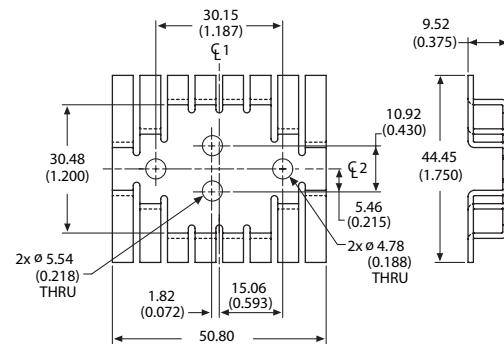

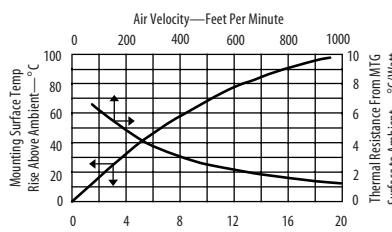

## ORDERING INFORMATION

Part Number	Finish
579103B00000G	Black anodize
579103V00000G	AavSHIELD <sup>3</sup>

## 5060 Low profile hat section heat sink

**Low profile hat section heat sink** is ideal for applications where low component heights are required such as card cages with PCBs mounted on 0.500 centers.

Material: 1.27 (0.050) Thick Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

Part Number	Description
506003B00000G	Low profile hat section heat sink

Material: 1.60 (0.063) Thick Aluminum  
Finish: Black Anodize

5792

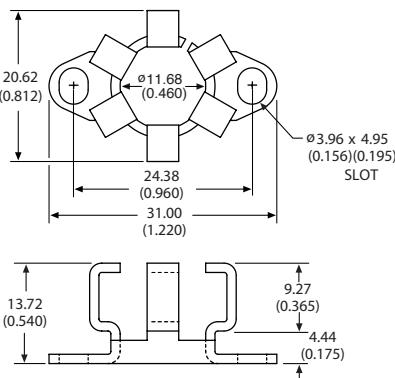

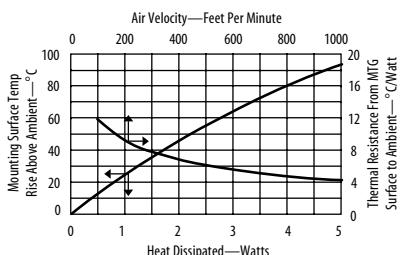

## Space saving expandable collar heat sink

**Space saving expandable collar heat sink** has the same footprint as the device being cooled meaning no extra board space is required to fit the heat sink. The expandable collar tightly grips the device.

#### **ORDERING INFORMATION**

Part Number	Finish
579206B00000G	Black anodize
579206V00000G	AavSHIELD <sup>3</sup>

Material: 1.27 (0.050) Thick Aluminum  
Finish: See Table

## TO-05 Heat Sinks

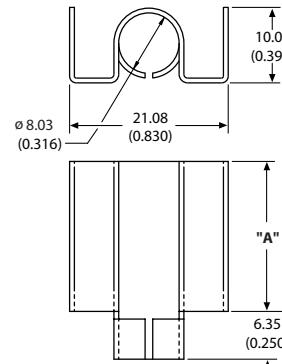

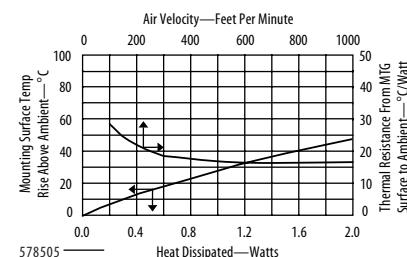

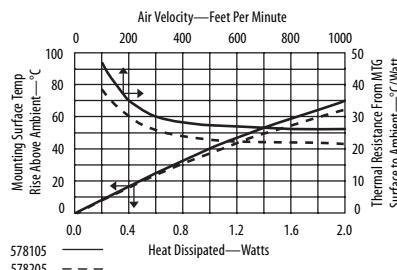

## 5781, 5782, 5783, 5784, 5785 Snap on cooler heat sink

**Snap on cooler** features easy no tools installation. Folded back fins provide maximum surface area while preserving valuable board space.

## ORDERING INFORMATION

Part Number	"A" Dim
578105B00000G	3.96 (0.156)
578205B00000G	6.35 (0.250)
578305B00000G	12.70 (0.500)
578405B00000G	19.05 (0.750)
578505B00000G	25.40 (1.000)

Material: 0.63 (0.025) Thick Aluminum  
Finish: Black Anodize

## 6201, 6202, 6203

## Space saving expandable heat sink

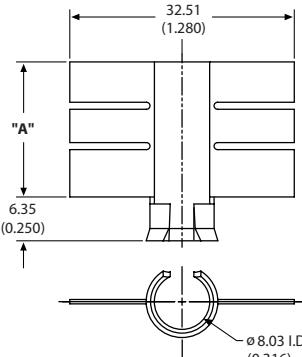

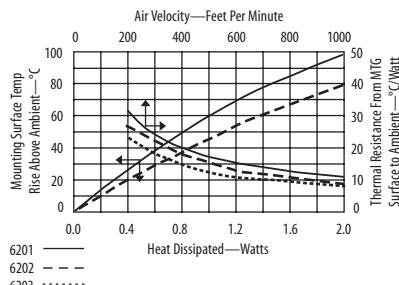

**Space saving expandable heat sink** features a collar that tightly grips the device meaning no extra hardware is required. Heat sinks are constructed of pre-black anodize material to lower cost.

## ORDERING INFORMATION

Part Number	"A" Dim	# Fins
6201PBG	6.35 (0.250)	1
6202PBG	12.70 (0.500)	2
6203PBG	19.56 (0.770)	3

\* Edges cut during the manufacturing process will be unfinished.  
See page 110 more more information

Material: 0.63 (0.025) Thick Aluminum  
Finish: Pre Black Anodize\*

## 5F

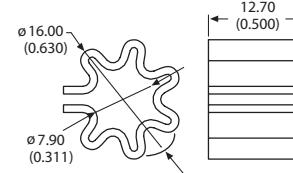

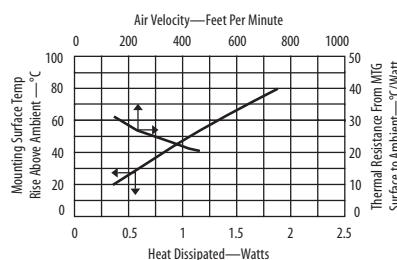

## Low cost push on heat sink

**Low cost push on heat sink** uses spring pressure to firmly grip the device case creating a good thermal interface.

## ORDERING INFORMATION

Part Number	Description
SFG	Low cost push on heat sink

Material: Aluminum  
Finish: Black Anodize

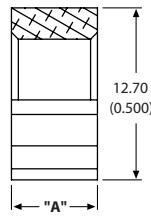

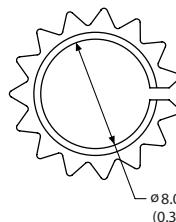

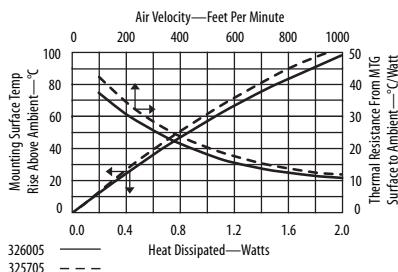

## TO-5 Heat Sinks

## 3257, 3260 Extruded collar style heat sink with radial fins

**Extruded collar style heat sink with radial fins.** The split collar design provides a press fit between the transistor and the heat sink creating an excellent thermal conduction path. Available in two heights.

Material: Aluminum  
Finish: Black Anodize

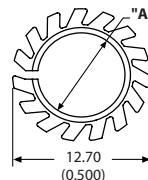

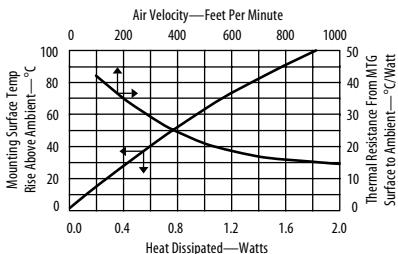

## ORDERING INFORMATION

Part Number	"A" Dim
325705B00000G	6.35 (0.250)
326005B00000G	9.53 (0.375)

## 3201, 3202 Extruded collar style heat sink with swept back fins

**Extruded collar style heat sink with swept back fins** for increased surface area in a small volume. The split collar design provides a press fit between the transistor and the heat sink creating an excellent thermal conduction path. Available in two inside diameters.

Material: Aluminum  
Finish: Black Anodize

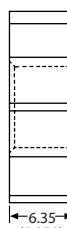

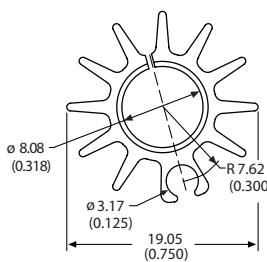

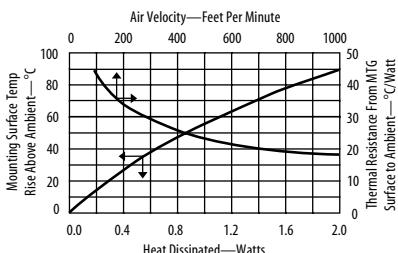

## ORDERING INFORMATION

Part Number	"A" Dim
320105B00000G	8.07 (0.318)
320205B00000G	7.75 (0.305)

## 3230 Extruded collar style heat sink with mounting hole

**Extruded collar style heat sink with mounting hole** for hardware attachment to the circuit card. The heat sink includes a mount boss that will accept a 4-40 screw for secure mounting in high vibration environments. The split collar design provides a press fit between the transistor and the heat sink creating an excellent thermal conduction path.

Material: Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

Part Number	Description
323005B00000G	Extruded collar style heat sink with mounting boss

## 6000

## Copper heat sink for axial lead devices

**Copper heat sink for axial lead device** requires no extra board space to mount. One lead of the heat sink is soldered to the device while the other solders to the PC board. Available in two finishes.

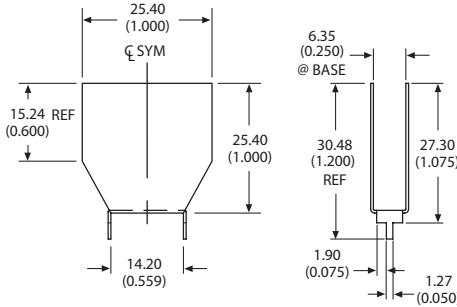

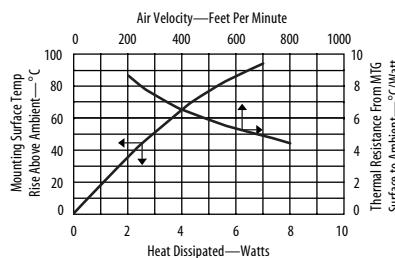

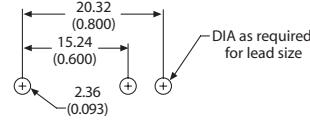

FIGURE A

Material: 0.53 (0.021) Thick Copper  
Finish: See Table

## ORDERING INFORMATION

Part Number	Description	Finish	Dia of PCB Plated Thru Hole for Tabs
6000UG	Heat sink for axial lead device	Unfinished	See figure A
6000DG	Heat sink for axial lead device	Tin plated*	See figure A

\* See page 110 for more information

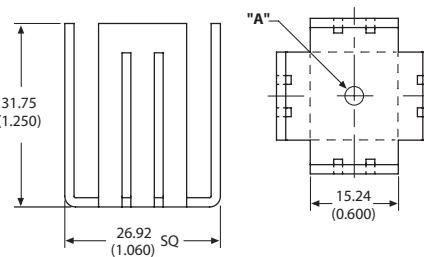

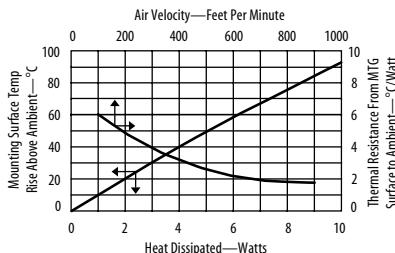

## Bridge Rectifiers

## 6222, 6223, 6224 Square basket style heat sink for bridge rectifiers

**Square basket style heat sink** for bridge rectifiers uses no additional board space. Available with three different mounting hole diameters.

Material: 1.27 (0.050) Thick Aluminum  
Finish: Black Anodize

## ORDERING INFORMATION

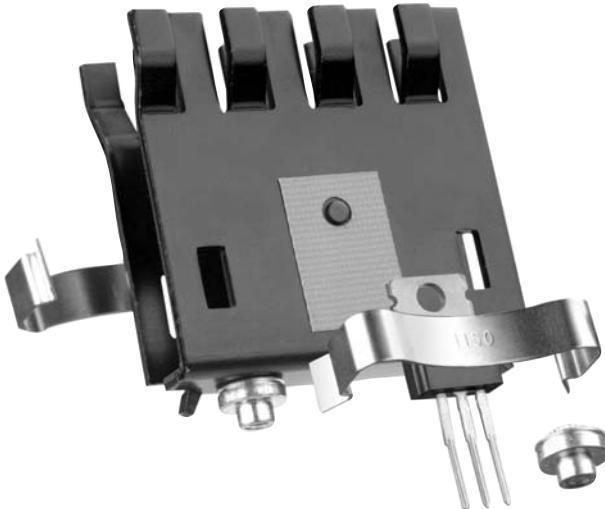

Part Number	"A" Dim
6222BG	3.61 (0.142) Dia Thru
6223BG	4.14 (0.163) Dia Thru
6224BG	4.77 (0.188) Dia Thru

Thermal solutions go beyond the heat dissipator itself. Aavid Thermalloy offers a total solution package, which includes a number of options and accessory items described in this section of the catalog.

A total thermal solution includes an efficient thermal interface and means of mechanical attachment. Aavid Thermalloy has a full-line of interface materials that can be pre-applied or supplied as an accessory item. Mechanical assembly options include attachment of semiconductors to heat sinks, heat sinks to printed circuit boards, and heat sinks to sockets of CPUs.

Aavid Thermalloy offers the most complete line of value added options of any supplier in the industry. Our full line of accessories includes mounting kits, shoulder washers, insulators, mounting pads, and various grease products and epoxies, which are sold separately, and can be used with a variety of Aavid heat sinks.

This section will provide the most complete solution to your thermal requirement.

## How to decipher an Aavid standard 12 digit part number

Aavid Thermalloy's standard product line in most cases consists of a 12-digit part number sequence. In most standard offerings, Digits 1 through 4, define the model basic part number. Digits 5 and 6 designate the package style that a particular heat sink is designed to cool. The 7th digit determines the finish, and the 8th identifies the interface material, if one can be used for that particular style heat sink. The 9th and 10th digits define the PC board mounting method, and the 11th and 12th digits define the method of attachment of the package to the heat sink. For digits 8,9,10,11 and 12, the absence of any of those options is always designated by a zero in those positions. Important NOTE: The 12 digit part number sequence is a general format. Due to the different variations and styles of heat sinks, we have included an Option Index on pages 82–84 to show available options and accessories for the products covered in this catalog.

Standard board level:

**5748 02 B 0 37 00 G**

A B C D E F G

- A** = Base Part Number
- B** = Package Style
- C** = Finish
- D** = Interface Material
- E** = PC Board Mounting
- F** = Package Mounting
- G** = RoHS Compliant

To order most Aavid Thermalloy heat sinks, you must use a 12 digit part number using the following options:

### Digits 5-6: Package style

CODE	DEVICE
00	Blank
01	TO-218
02	TO-220, TO-216, TO-217
03	TO-3
04	TO-202
05	TO-5, TO-39
06	TO-66
08	TO-247
10	Multiwatt/SIP
21	Dual TO-218
22	Dual TO-220

### Digit 7: Finish

CODE	DESCRIPTION
B	Black Anodize
D	Solderable 100% Tin Finish
J	Pre-Black Anodize
M	Green Anodize
U	Unfinished
V	AavSHIELD <sup>3</sup>
W	Black Anodize w/Black Paint

For additional information see page 110

### Digit 8: Interface material

CODE	DESCRIPTION
0	None
1	One Kon-Dux™ Pad
2	Two Kon-Dux™ Pads
3	One In-Sil-8™ Pad
4	Two In-Sil-8™ Pad
7	One Hi-Flow® Pad
8	Two Hi-Flow® Pads

For additional information see pages 86 and 87

### Digits 9-10: PC Board mounting

#### Solderable Wave-On™ mounts

CODE	STAND-OFF	THREAD
01	0.100"	#6-32
02	0.100"	#4-40
03	0.045"	#4-40
04*	0.100"	#6-32
05	0.045"	#6-32
07	0.100"	3.5mm
09	0.200"	#6-32
13	0.129"	#6-32

\* 0.090 PCB (others 0.062")

## How to decipher a Thermalloy origin part number?

Aavid Thermalloy features a variety of Thermalloy origin standard products that consist of a different part number sequence than the standard Aavid 12 digit part numbering system. In most cases, digits 1 through 4, designate the basic model number of the heat sink. Digits 5-6, designate the finish of the heat sink. Digits 6-13 can designate any number of different options that come with a specific model number. (Please refer to Option Index D on page 85 to see Aavid Thermalloy's offerings per base number.)

To order most Thermalloy origin heat sinks you must use the basic part numbering system below:

Standard board level:

**6021** - **A** - **B** - **C** - **D** - **G**

**A** = Model Number

**B** = Finish

**C** = Productivity Enhancement (if applicable)

**D** = Second Productivity Enhancement (if applicable)

**E** = RoHS Compliant Suffix

### Popular finishes\*

(followed after base number in location B above)

B=Black Anodize  
PB= Pre-Black Anodized  
D=Tin Plated  
U=Clean, No Finish  
V=AavSHIELD<sup>3</sup>

### Popular productivity enhancing options:

Digits (Figure C-D above)

P\_= Solderable Roll Pins (see page 94)  
TC\_\_ = Thermal Clip (see page 98)  
CNE\_\_ = Clinch Nuts (see page 95)  
CNM\_\_ = Clinch Nuts Metric (see page 95)  
MT= Mounting Tabs (see page 93)  
8223-CL03,8241-CL11 = Alignment Pad (see page 87)  
SE\_\_ = Solderable Studs (see page 96)  
SF\_\_ = Mounting Studs (see page 96)  
G\_\_ = Grafoil® Pad (see page 86)  
SNM\_\_ = Solderable Nuts Metric (see page 94)  
SNE= Solderable Nuts (see page 94)  
BGS\_\_ = BGS Clip (page 18)

\*For additional information see page 110

Note: For a wide range of part number specific options, please see our Aavid Option Index D on page 85

## Option Index A

Available option codes for Aavid 12 digit part numbers. For additional information on option codes see "How to decipher an Aavid 12 digit part number" on page 80. To find the appropriate Option Index for a selected part number please refer to the main product section in the front of the catalog or "How to use this catalog" on page 2.

# Interface Material/Pads

## In-Sil-8™

These silicone based pads provide both thermal conductivity and electrical isolation. In-Sil-8™ pads have a fiberglass carrier that withstands the rigors of assembly, harsh environments and aging under continuous use. In-Sil-8™ pads install faster than traditional mica and grease and will not contaminate solder baths. Screw mounting is recommended to achieve the best thermal performance.

### ORDERING INFORMATION

example 12 digit part **507222B T 0000G**  
Ordering code

The shape and hole pattern of the heat sink will determine the shape and hole pattern of the pad. If you are ordering a heat sink which mounts to a semiconductor on both sides, the ordering code for two pads should be used. To order additional In-Sil™ pads separate, or factory applied variations please contact an Aavid sales rep for inquiries.

## KonDux™ / Grafoil® Conducta-Pad\*\*

Kondux™ interface pads are a cost effective alternative to thermally conductive grease compounds. Kondux™ pads are electrically conductive and ideal for use with small, discrete semiconductors. Aavid pre-applies Kondux™ to your heatsink to enhance heat conductance from the semiconductor case and speed your manufacturing process.

### ORDERING INFORMATION

Tensile strength	650 psi
Ultimate compression strength	12500 psi
Service temperature	-240°C to +300°C
Liner	None

**Hi-Flow® \***

Aavid Thermalloy has added a phase change pad to its line-up. These pads provide low thermal resistance and electrical isolation for low pressure spring mount applications. Above the phase change temperature the material flows to fill in surface irregularities and maximize the heat conduction path.

**ORDERING INFORMATION**

example 12 digit part **530101B T 5150G**  
Ordering code

The shape and hole pattern of the heat sink will determine the shape and hole pattern of the pad. If you are ordering a heat sink which mounts to a semiconductor on both sides, the ordering code for two pads should be used. TO-220 Thermal performance (°C/W)	1.15	1.14	1.12	1.1

**Alignment Pads**

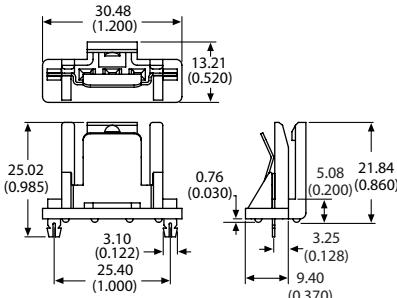

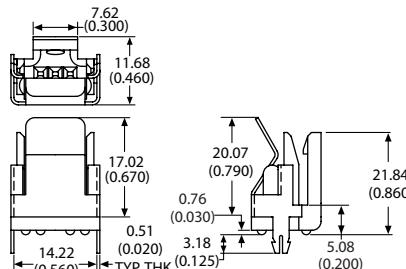

Solderable alignment pads are an innovative way to attach the heat sink to your transistor that could cut your assembly time by more than half. Alignment pads provide cost effective solderability, while providing numerous additional benefits. Alignment pads are factory applied and can be bought separately as well. Please refer to accessory Index D on page 85.

# Interface Material / Double Sided Tape

Double-sided thermal tapes adhere the heat sink to the device and offer good thermal characteristics. They are easy to apply, require no curing time, can be electrically conductive or isolating, and need no mechanical support to provide thermal or physical contact between the device and the heat sink. Aavid can apply one side to a heat sink.

## ORDERING INFORMATION

example 12 digit part 375224B000 \_ G

Ordering code	Tape option	Ordering code
31	T414	
32	T405R	
33	T412	
34	T410R	
35	T411	

## T414 for ceramic or metal packages

Uses a 0.001 inch (0.03 mm) Kapton MT™ filled polyimide film coated on both sides with high-bond strength, pressure-sensitive acrylic adhesive that is loaded with aluminum oxide particles. This provides both good thermal performance and excellent electrical isolation.

Color	Beige
Electrical function	Insulating
Thickness	0.127 mm (0.005)
Carrier	Kapton MT™
Thermal impedance	0.60 °C-in²/w
Thermal conductivity	0.37 w/m-k
Breakdown voltage	5000 VAC
Volume resistivity	5 x 10¹⁵ Ohm-cm
Lap shear adhesion	125 (0.862) psi
Die shear adhesion	
Aluminum 25°C	150 psi
Aluminum 150°C	15 psi
Creep adhesion	
25°C @ 12psi	>50 days
150°C @ 12psi	>10 days

## T405R for ceramic or metal packages

Uses a 0.002 inch (0.05 mm) aluminum foil core coated on both sides with high-bond strength, pressure-sensitive acrylic adhesive that is loaded with aluminum oxide particles. The aluminum foil provides added thermal conductivity for applications where electrical isolation is not required. The combination of filter, expanded metal and embossed surface enhances both tape conformability and thermal performance.

Color	White
Electrical function	Conductive
Thickness	0.006 (0.015)
Carrier	Aluminum
Thermal impedance	0.54 °C-in²/w
Thermal conductivity	0.50 w/m-k
Breakdown voltage	N/A
Volume resistivity	3 x 10-2 Ohm-cm
UL flammability	94V-0
Rating	UL.94
Lap shear adhesion	134 psi
Die shear adhesion	
Aluminum 25°C	125 psi
Aluminum 150°C	55 psi
Alum.oxide 25°C	145 psi
Alum.oxide 150°C	60 psi
Creep adhesion	
25°C @ 12 psi	>50 days
150°C @ 12 psi	>50 days

## T412 for ceramic or metal packages

Uses an expanded foil carrier coated on both sides with high-bond strength, pressure sensitive acrylic that is loaded with titanium diboride particles. The combination of filter, expanded metal and embossed surface enhances both tape conformability and thermal performance.

Color	Grey
Electrical function	Conductive
Thickness	0.009 (0.23 )
Carrier	Expanded aluminum
Thermal impedance	0.25 °C-in²/w
Thermal conductivity	1.40 w/m-k
Breakdown voltage	N/A
Volume resistivity	N/A
UL flammability	N/A
Lap shear adhesion	70 psi
Die shear adhesion	
Aluminum 25°C	135 psi
Aluminum 150°C	25 psi
Alum.oxide 25°C	125 psi
Alum.oxide 150°C	40 psi
Creep adhesion	
25°C @ 12 psi	>50 days
150°C @ 12 psi	>10 days

## T410R / T411 for plastic packages

**T410R thermally conductive tape** consists of a high bond strength, pressure sensitive acrylic adhesive loaded with aluminum oxide and coated onto a 0.002 inch (0.05mm) aluminum foil carrier. The other side of the foil carrier has a silicone pressure sensitive adhesive which provides excellent adhesion to silicone-contaminated plastics and other low energy surfaces.

**T411 thermally conductive tape** consists of a high bond strength, pressure sensitive adhesive with an aluminum mesh carrier layer. The mesh carrier allows the tape to conform to curved surfaces of plastic molded IC packages, providing a high adhesive strength attachment for heat sinks. The high performance silicone PSA allows adhesion to silicone-contaminated plastics and other low energy surfaces.

Typical properties	T410R	T411
Construction	Acrylic	Silicone
Adhesive (to heat sink side)		
Color	White	Clear (silver)
Carrier	Aluminum foil	Aluminum mesh
Adhesive (onto component side)	Silicone	Silicone
Color (to component side)	Clear (Silver)	Clear (Silver)
Thickness, mm (inch)	0.18 (0.007)	0.28 (0.011)
Thermal impedance @<1 psi °C-cm²/w (°C-in²/w)	7.1 (1.1)	6.5 (1.0)
Operating temperature range, °C	-50 to +150	-50 to +150
Lap shear adhesion, psi (MPa)	60 (0.414)	14 (0.094)
Die shear adhesion, psi (MPa) steel/FR4		
25°C	170 (1.172)	80 (0.552)
125 °C	40 (0.276)	20 (0.138)

Note: Double Sided Tapes are factory applied only.

## Wave-On™ Mounts

Solderable mounts can be factory installed to practically every board-mountable heat sink and flat sided extrusion. The female threaded through holes permit pre-assembly to the semiconductor via machine screws , allowing the heat sink/semiconductor package to be treated as one unit when fitted in PC board through holes for wave soldering.

## FEATURES

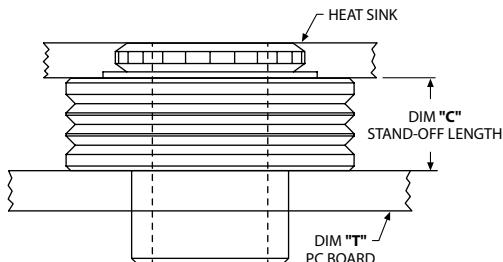

#### **Saves production time and cost**

- Cuts production steps by half
  - Factory installation eliminates steps
  - Permits soldering in one step
  - All the benefits of female threaded mount
  - Automated fastening
  - Excellent solderability

#### Better thermal performance

- Built in stand-off adds air space between PCB and heat sink for improved air flow and easier cleaning
  - No lockwashers, nuts or separate mounts with various thread lengths

## Typical Wave-On™ mount installation

## Shur-Lock™ Tabs

Aavid's Shur-Lock™ self locking stand-off tab (U.S. Patent #5,437,561) positively secures any heat sink to the printed circuit board. This Shur-Lock™ tab exhibits many unique design features.

The rounded and bifurcated tip of the Shur-Lock™ solderable tab has been designed to easily snap into any 0.093" diameter hole. Once through the hole, the tab provides a positive resistance to backing or falling out of the hole. In addition, the spring action between the tab and the plated through hole prevents leaning or lift-off of the heat sink prior to or during the soldering process. The tip extension of the Shur-Lock™ tab has been designed to protrude less than 0.060" beyond the back of a standard 0.0625" PC board, which is below the normal lead trimming allowance for assembled PCBs.

Shur-Lock's™ stand-off design facilitates the cleaning of assembled PCBs and permits electrical traces to be routed under the heat sink. The wide base supports of the tab further improve the stability of the heat sink assembly.

### ORDERING INFORMATION

example 12 digit part **574802B0** 00G  
Ordering code

### PRODUCT INFORMATION

Material	Spring steel
Finish	Tin plating over a copper flash
Pull-out force*	70 lbs/tab minimum
Recommended	
PCB hole diameter	0.092" - 0.096"
PCB thickness	0.065" - 0.068"

Variations of the above specifications are possible. Contact Aavid Thermalloy for additional details for use with thicker PCB sizes, such as 0.093" or other hole diameters.

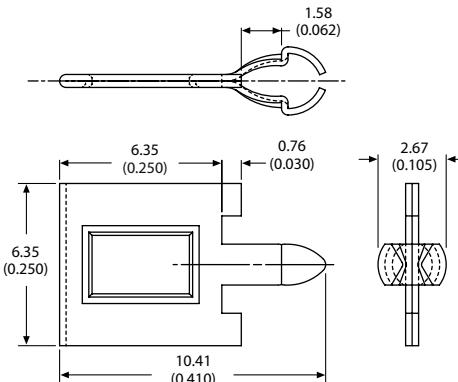

\*Vertical force applied to the sink-tab joint.

### FEATURES

- Positive PCB engagement
- Integrated PCB stand-off
- Quick "snap-in" assembly design
- Reduces installed assembly cost
- Designed for rugged shock and vibration environments
- Can be installed on a variety of stamped and extruded board level heat sinks

Factory applied only

## Tab ordering code 28

## Solderable Staked on Tabs

Aavid solderable tabs stake onto heat sinks for solder mounting into the PC board. The tabs are available in a variety of lengths, widths and thicknesses.

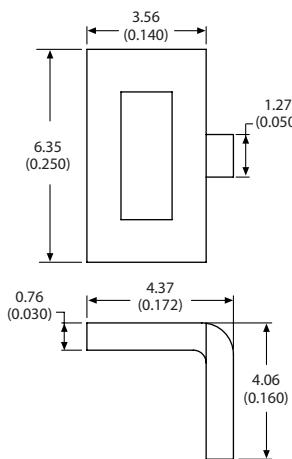

Tabs are factory applied for both vertical and horizontal mountings including: step tabs, which keep the heat sink elevated above the board, and tabs with a triangular base for extra stability.

Many of Aavid's tabs are customized. Below are examples of standard tabs. Please consult Aavid's customer service department for information about other tab options.

## Tab ordering code 43

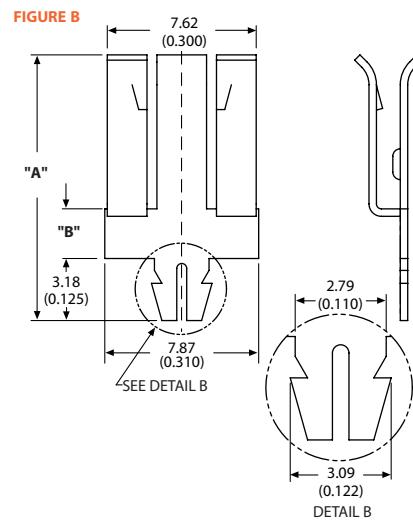

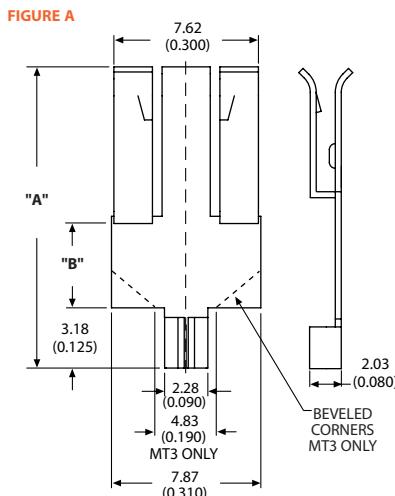

## Solderable Mounting Tabs

Heat sinks ordered with solderable mounting tabs have tin-plated spring steel tabs permanently locked onto the heat sink to provide wave solderability. The solderable tabs are mounted on the heat sink after anodizing, thus eliminating any special coating or handling. The result is a wave solderable heat sink with black anodized performance.

MT2	54	8.51 (0.335)	Solderable mounting tab	19.18 (0.755)	8.13 (0.320)	A	$2.90 \pm 0.10 (0.114 \pm 0.004)$
MT3	55	5.21 (0.205)	50 degree beveled corners on stand-off portion reducing board footprint from 7.87 (0.310) to 4.83 (0.190) width. Only tab with this feature.	15.88 (0.625)	4.83 (0.190)	A	$2.90 \pm 0.10 (0.114 \pm 0.004)$
MT5	56	5.21 (0.205)	Bifurcated tabs in lieu of triangular shape	15.88 (0.625)	4.83 (0.190)	B	$2.95 \pm 0.05 (0.116 \pm 0.002)$
MT6	57	2.92 (0.115)	Bifurcated tabs in lieu of triangular shape	13.59 (0.535)	2.54 (0.100)	B	$2.95 \pm 0.05 (0.116 \pm 0.002)$

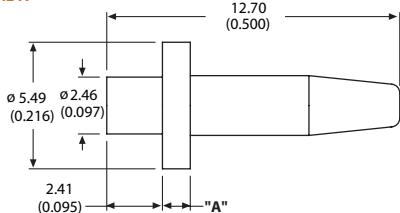

Notes: Mounting tabs have unique locking features built into their design. Aavid Thermalloy adds to standard and custom heat sinks. For this reason, the tabs are factory applied, and cannot be sold separately. Please see page 85 for additional tab options.

# Solderable Pins / Solderable Nuts

## Solderable Pins

Vertically mounted, extruded heat sinks are converted to wave solderable with the addition of solderable roll pins. Roll pins are available with stand-off shoulders in different heights for easier cleaning after wave soldering.

P3	N/A	Solid pin w/stand-off shoulder 0.125"	0.125	A
N/A	25	Solid solderable pin		B

## Solderable Nuts

Solderable nuts are permanently swaged into the heat sink for quick pre-assembly with the transistor. Screws are used to mount to the heat sink and are installed from the top. Solderable nuts feature a closed end that prevents solder from wicking into threads and trapping contaminants or flux. Heat sink and transistor are then handled as a single component and dropped into plated-thru holes in the PC board for wave soldering. (Solderable nuts require slightly larger printed circuit board hole sizes)

## ORDERING INFORMATION

SNE-2	13	4.95 (0.195)	6-32 UNC-2B

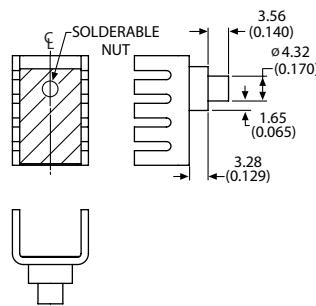

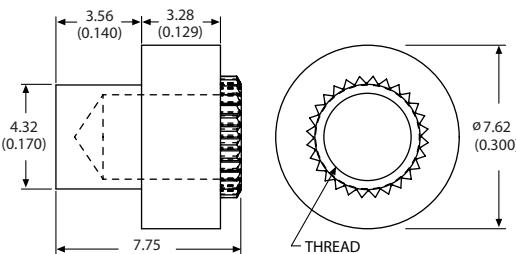

Note: If a part number requires 2 solderable nuts, simply add a "/2" after the solderable nut character suffix on Thermalloy origin parts.

## Mechanical drawings showing heat sinks with solderable nuts

## FEATURES

- Pre-mounted to heat sink at factory
- Ease of pre-assembly in production
- Mechanical and electrical integrity
- Wave solderability

## Cinch Nuts

Cinch nuts are threaded nuts that allow quick assembly of the transistor to the heat sink. A single screw mounts the transistor to the heat sink, reducing your hardware requirements. Clinch nuts are permanently pressed into the heat sink, and come in a variety of English and Metric threads—CNE designates an English thread, and CNM designates a Metric thread.

## Studs

### Solderable Studs

Threaded solderable studs are permanently swaged in place for quick pre-assembly with the transistor. The device is placed over the stud (s) followed by the lock washer and nut. This entire component is then dropped into plated-thru holes in the printed circuit board for wave soldering. The end of the stud is tin-plated for excellent solderability and extends only 0.040" below a 0.062" PC board to clear lead trimming saws.

# Clips

## Thermal Clips

**Factory-Installed ONLY thermal clips**, available on many standard heat sinks (shown below) eliminate the use of screws and nuts in assembling the heat sink and transistor. Plastic case transistors slip into place for easy assembly. Thermal clips are available in a variety of configurations. Locking clips have an internal tab to lock the transistor permanently in place.

## Mounting Kits

### FEATURES

- Pre-packaged in heat-sealed plastic bags for use on assembly line.
- Stock mounting hardware using one number for better control and identification.
- Three different insulating materials available:  
Low cost Thermalfilm™  
High temperature Mica  
High performance Thermalsil™ III
- Other insulator materials available for special order include:  
hard anodized aluminum and aluminum oxide.
- Individually packaged for convenient stocking and handling of mounting hardware. Kits contain all hardware necessary to electrically isolate the transistor from the heat sink.

Note: Smooth side of flat washer should be placed against insulator when using the kit.

# Insulating Shoulder Washers

## FEATURES

- Available in nylon or polyphenylene sulfide
- Chemically inert [no known solvents under 200°C (392°F)]
- Maximum recommended service temperature of 260°C (500°F)
- Recommended torque is 0.565Nm to 0.678Nm (5 to 6 inch-pounds) on all shoulder washers except -7, which has recommended torque of 0.452Nm (4 inch-pounds)

## ACCESSORIES

### Polyphenylene Sulfide PPS Shoulder Washers

**Thermalfilm™ Polyimide Plastic Films**

Thermalfilm™ and Thermalfilm™ MT are low cost polyimide plastic insulating films designed to be an improved replacement for mica. These insulators have a distinctive amber color and can be easily recognized and assembled on a production line.

Thermalfilm™ MT, made from high performance Kapton™ MT material, provides thermal conductivity nearly 2-5 times greater than standard Thermalfilm™. Both insulators have an extremely high resistance to flow or thin out under high compressive stresses, particularly at elevated temperatures. Excellent physical, mechanical and electrical properties remain nearly constant over a wide range of temperatures and frequencies. They are radiation resistant, have no melting points, and have no known organic solvents. The polyimide plastic film is UL listed as a component in UL's publication "Component - Plastic Material" dated September 18, 1969. The UL card number is E39505R, Guide QMFZ2 filed by E.I. du Pont de Nemours & Co., Inc. Thermalfilm™ is rated 94-V/0.

**ORDERING INFORMATION**

For standard pre-cut sizes of Thermalfilm™ and Thermalfilm™ MT see page 102.

## Mica and Thermalsil™ III

Thermalsil™ III provides excellent thermal conductivity and electrical resistance. It is used as an electrically-isolating interface material composed of silicone elastomer binder with a thermally conductive filler. It is reinforced with glass cloth to resist tearing and cut-through due to burrs on transistors or heat sinks.

Thermalsil™ III eliminates the need for grease application and conforms to mounting surfaces under clamping pressure for optimum heat conduction. The finely woven glass cloth provides the thinnest possible matrix for enhanced thermal resistance. Thermalsil™ III is available in any configuration with adhesive backing.

Mica insulators provide high maximum operating temperatures (550°C) and excellent electrical properties.

## TYPICAL PROPERTIES FOR MICA INSULATORS

Property		Electrical
Dielectric strength		172 X 10³ volts/mm (4500 volts/mil) 0.025 mm to 0.076 mm thick in air (1 to 3 mils thick in air)
Dielectric constant		6.5 to 8.7
Dissipation factor		0.0001-0.0004 @ 10³ Hz
Volume resistivity		10¹⁵ ohm-cm
Physical		
Modules of elasticity in tension		172 X 10³ MPa (25 X 10⁶) psi
Tensile strength		310 MPa (45,000 psi)
Hardness mohs, shore		3.0, 115
Compressive strength		2.21 X 10⁹ Pa (32,000 psi)
Specific gravity		2.9
Thermal		
Thermal conductivity		0.528 W/(m °C) (0.30 Btu/hr-ft °F)
Coefficient of thermal expansion		3.24 X 10⁻⁵°C (1.8 X 10⁻⁵ °F)
Specific heat		0.084 KJ/Kg °C (0.02 Btu/Lb °F)
Melting point		1275°C (2327 °F)
Max. operating temperature		550 °C (1022 °F)

## TYPICAL PROPERTIES FOR THERMALSIL™ III

Property		Typical value 25°C	Test method
Electrical			
Dielectric constant		2.5@50 Hz 2.5@10³ Hz 2.5@10⁶ Hz	ASTM D-150
Dielectric breakdown voltage		26.3 x 10³ volts/mm (667 volts/mil)	ASTM D-149
Volume resistivity		5.7 x 10¹⁵ ohm-cm	ASTM D-257
Dielectric dissipation factor		0.008@50 Hz 0.004 @10³ Hz 0.004 @10⁶ Hz	ASTM D-150
Physical			
Thickness		0.15mm (0.006 inch)	
Color		Gray-Green	
Tensile strength		6.1 x 10⁷ Pa (8786 psi)	
Hardness, shore A		87	
Elongation		2% or less	
Thermal			
Thermal conductivity		0.92 W/(m °C) (0.532 Btu/hr-ft °F)	
Flame resistance		UL 94V-0	UL card #E-58126 (S)
Service temperature		-60°C to 180°C (-76°F to 356°F)	

# Insulators – Aluminum Oxide

## Aluminum Oxide

Aluminum oxide has unique thermal conductivity qualities and features low loss factors at high frequencies. It has high compressive strength, high volume resistivity, low thermal expansion and resists radiation.

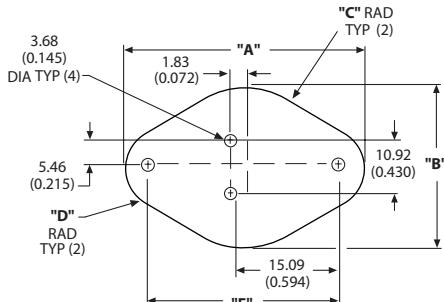

Aluminum oxide insulating washers have a dielectric strength of approximately  $21.7 \times 10^3$  volts/mm for .76mm material (550 volts/mil for 0.030 inch material) and  $16.9 \times 10^3$  volts/mm for 1.57mm material (430 volts/mil for 0.062 inch material). The thermal conductivity of aluminum oxide is  $15.06\text{W}/(\text{m}^\circ\text{C})$  at  $75^\circ\text{C}$ .

PROPERTY	CHEMICAL – TYPICAL VALUE	TEST METHOD
$\text{Al}_2\text{O}_3$	94% nominal	Spectrographic analysis (100%-6% by wt. of total metallic impurity)
Dielectric constant $25^\circ\text{C}$ ( $77^\circ\text{F}$ )	<b>ELECTRICAL</b> 8.9 (1MHz) 8.9 (10GHz)	ASTM D150-70 ASTM D2520-70

## 8923-1, 8923-2, 8924 Stanchion Pads

### FEATURES

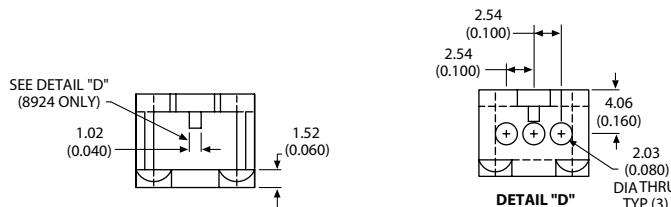

- Reduces stress on leads during wave solder and post-soldering operations
- Provides stable mount to resist shock and vibration damage to leads
- 8923-1, 8923-2, and 8924 fit the TO-220

### ORDERING INFORMATION

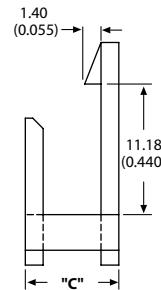

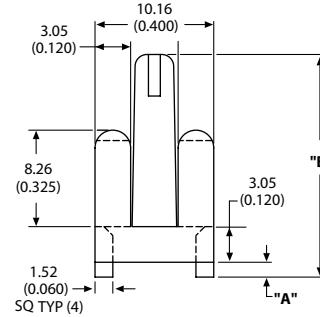

Part number	"A" Dim	"B" Dim	"C" Dim
8923-1G	2.54 (0.100)	20.32 (0.800)	8.00 (0.315)
8923-2G	1.27 (0.050)	19.05 (0.750)	8.00 (0.315)
8924G	1.27 (0.050)	19.05 (0.750)	7.87 (0.310)

Note: Tolerances  $\pm 0.25$  (0.010) unless otherwise specified.

Material is nylon 6/6 rated 94 V-O

DETAIL "D"  
(8924 ONLY)

# ACCESSORIES

## Insulating Covers

### TO-3 Insulating Covers

Insulating covers are designed to provide protection from accidental shock during field service or repair.

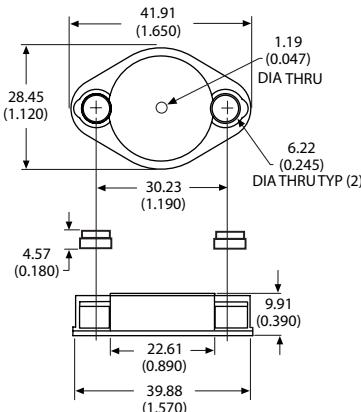

Pan head screws not provided—MS 51957-30 or equivalent recommended—secure the cover to the TO-3. At the typical mounting screw torque of 0.68–0.90 Nm (6–8 inch pounds), the TO-3 cover material cold-flows around the screw head to securely fasten the cover.

Included are No.6 split washers as inserts to provide electrical connection of mounting screws to the TO-3 collector and an insulating snap-in cover for the screw heads. A test probe hole is provided in the top of the cover.

The 8903VB is made from thermoplastic polyester that meets the requirements of UL Bulletin 94 V-O. In addition to its excellent flammability rating, thermoplastic polyester offers resistance to most chemical environments, heat deflection temperature to 215.6°C (420°F) and UL continuous use temperature of 130°C (266°F).

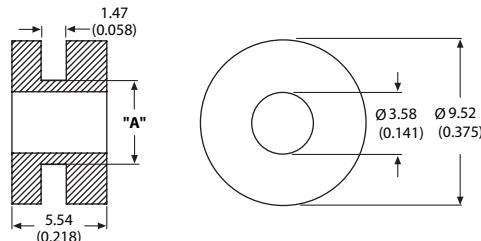

### ORDERING INFORMATION

Part number	Material	Color	Flammability standards
8903NWG	Nylon	White	Self-extinguishing UL 94 V-2
8903VBG	Thermoplastic polyester	Black	Self-extinguishing UL 94 V-0 UL 492 Type 1

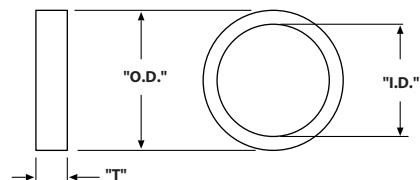

### Teflon-filled Acetal Insulators for TO-3

Part number	Fits notch	"A" Dim
103G	4.83 (0.190)	4.90 (0.193)
109G	6.35 (0.250)	6.35 (0.250)

### Teflon-filled Acetal Bushings for TO-3

Part number	"I.D."	"O.D."	"T"
110G	5.03/5.21(0.198/0.205)	6.81/6.98 (0.268/0.275)	1.57/1.40 (0.062/0.055)
113G	6.43/6.60 (0.253/0.260)	7.82/8.00 (0.308/0.315)	1.57/1.40 (0.062/0.055)

**FEATURES**

- Prevent heat damage during soldering
- Facilitate board clean-up
- Prevent solder bridges
- Assure uniform device height

**PRODUCT INFORMATION**

Suffix	Base material	MAXIMUM OPERATING TEMPERATURE		
		Continuous	Deflection	Color
NG	Nylon base resin per ASTM STD D4066-82-PA111	121.0°C 250°F	243.3°C 470°F	Natural
DAPG*	Diallyl Phthalate per MIL-M-14G type SDG	204.4°C 400°F	282.2°C 540°F	Black only

\* All "DAP" mounting pads meet UL 94 V-0

Note: Please specify material for each mounting pad: "N" = nylon; "DAP" = Diallyl Phthalate.  
Example: 7717-3NG, 7717-86DAPG

# Finishes

Finish	Aavid Code	Thermalloy Suffix	Description
Black Anodize	B	B	Recommended for increased thermal performance. Anodize is electrically isolating and does not provide electrical insulation.
AavSHIELD <sup>3</sup>	V	V	For corrosion protection or painting only. Color variation may be expected with this finish. Chromate is electrically conductive. Does not provide electrical insulation.
Tin Plating	D	D	Allows heat sink to be soldered to the PC Board.
Pre-Black Anodized	J	PB	Edges cut during the manufacturing process will be unfinished.
Green Anodize	M		Alternative finish to Black anodize. Recommended for increased thermal performance. Electrically isolating but does not provide electrical insulation.
Unfinished	U	U	Clean, no finish.
Black Anodize w/Black Paint	W		Paint on mounting surface prevents metal from contacting the circuit thus avoiding shorts.

## ORDERING INFORMATION

**Aavid Thermalloy code** – Finish option must be noted by one of the above letters in the 7th position. Aavid's standard finish is black anodize (B) unless otherwise noted.

example 12 digit part **530122B00000G**  
 A      B      C  
 A = Base part  
 B = Finish code  
 C = RoHS compliant

**Thermalloy origin suffix** – The suffixes should be added after the model number to indicate the desired finish.

example  
 Thermalloy origin part **6396B G**  
 A    B    C  
 A = Model number  
 B = Finish suffix  
 C = RoHS compliant

Note : All thermal graphs reflect black anodize finish.

## Snap-On Ejectors / Pullers

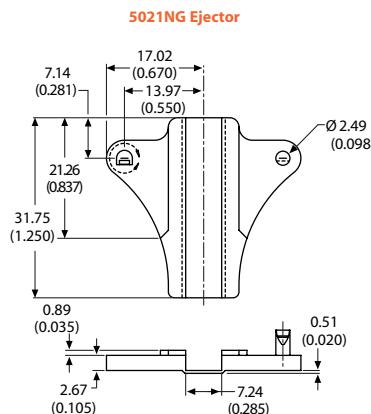

### FEATURES

- Saves time – no roll pin required
- Excellent for retrofit applications
- Material is nylon per ASTM D4066-82PA162F11
- Cost no more than conventional ejector/puller
- Rated at 222.5N (50 lbs.) / ejector force per pair
- One piece – no assembly required
- May be heat stamped

### ORDERING INFORMATION

**Part number**

5021NG

## Standard Ejectors / Pullers

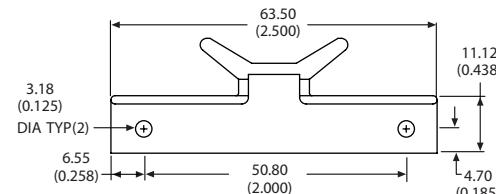

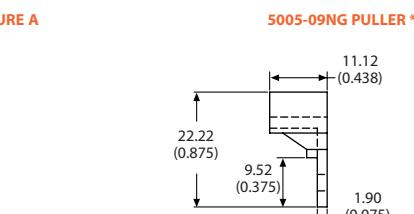

### FEATURES

- Lever action releases card from its connector safely and quickly
- Cards, their components and connectors are less frequently damaged when extracting PC boards
- No special extraction tools are needed for board removal
- Material is nylon per ASTM D4066-82 PA120B4413F24, UL 94 V-O rated (natural color)
- Roll pins are provided (NAS 561-P3-4)

### Sil-Free™

Sil-Free™ 1020 is a metal-oxide-filled, silicone-free synthetic grease specially formulated to enhance heat transfer across the interface between the semiconductor case and the heat sink without the migration or contamination associated with silicone-based products.

Dry interface case-to-sink thermal resistance is typically reduced 50% to 75% with proper application of Sil-Free™ 1020.

This virtually "no-bleed", high-performance compound will not dry out, harden, melt, or run, even after long-term continuous exposure to temperatures up to 200°C. Even in a vacuum atmosphere (10-5 Torr, 24 hours@100°C), Sil-Free™ 1020 exhibits virtually "no bleed" or evaporation.

#### ORDERING INFORMATION

Part number	Package	Size
101700F00000G	Syringe	43 grams (1.5 oz)
101800F00000G	Tube	57 grams (2.0 oz)

102000F00000G	Tube	143 grams (5.0 oz)
102100F00000G	Jar	457 grams (16.0 oz)

### Ther-O-Link™

Ther-O-Link™ is a silicone-based thermal compound that cost effectively enhances the heat transfer between a semiconductor case and a heat sink. Easy to apply, Ther-O-Link™ substantially reduces dry interface thermal resistance, while providing long life under a variety of conditions.

#### ORDERING INFORMATION

Part number	Package	Size
100000F00000G	Ampule	1 gram (0.03 oz)
100100F00000G	Syringe	35.7 grams (1.25 oz)

132000F00000G	Can	9.07 kg (20 lb)

### Ultrastick™

Aavid's Ultrastick™ is a unique phase-change thermal interface material that surpasses grease in thermal performance and long-term stability. This solid, silicone-free, paraffin-based thermal compound changes phase at 60°C, with a concurrent volumetric expansion that fills gaps between the mating surfaces. Ultrastick™ comes in a convenient applicator bar, allowing for neat, fast application to both heat sink and component surfaces. One cost-effective application leaves a thin, film-like deposit, providing excellent heat transfer and low interface thermal resistance.

**Thermalcote™**

Thermalcote™ is a superior thermal joint compound of thermally loaded silicone based grease for use with all heat sinks. It improves the transfer of thermal energy across the metal to metal interfaces between the transistor or rectifier case and the heat sink. Thermalcote™ conducts heat approximately 15 times better than air and more than 4 times better than unloaded silicone grease. It is non-toxic, extremely stable, and neither cakes or runs from -40° to 204°C (-40°F to 399°F).

**ORDERING INFORMATION**

**Thermalcote™ II**

Thermalcote™ II was developed as the sensible alternative to silicone-based thermal greases. Thermalcote™ II employs a highly conductive synthetic base fluid that enables the finished product to exhibit the same thermal characteristics as the silicone-based products.

Thermalcote™ II contains no silicone. The high lubricity of the base oil permits efficient application to both semiconductor case or heat sink, and it will effectively fill the microscopic air gaps on the metal-to-metal mating surfaces. It is non-toxic, extremely stable, and neither cakes or runs from -40° to 200°C (-40°F to 392°F).

Part number	Net weight
349G	28 grams (1 oz) tube
350G	57 grams (2 oz) jar
351G	0.45 kg (1 lb) can

**PRODUCT INFORMATION**

<b>Color</b>	Blue
<b>Operating temperature range</b>	-40°C to 200°C (-40°F to 392°F)
<b>Thermal conductivity</b>	0.699W/(M °C ) (0.204 Btu/hr ft °F)
<b>Dielectric strength</b>	7.9 x 10 <sup>3</sup> volts/mm (200volts/mil) 1.27 mm gap (0.050" gap)
<b>Cleaning solvent</b>	Mineral spirits or turpentine
<b>Specific gravity</b>	2.93@60°F (15.6°C)
<b>Evaporation,</b>	
<b>24 hours@200°C (392°F), wt%</b>	0.6 max
<b>Shelf life</b>	Indefinite (unopened)*

\* It is recommended that the containers be turned over every 6 months to minimize settling for ease of mixing

### Ther-O-Bond™ Adhesive

#### ORDERING INFORMATION

Part number	Description	Package/Kit	Size
159900F00000G	Ther-O-Bond™ 1500	Resin and hardener	0.946 liter (1 qt)
161000F00000G	Ther-O-Bond™ 1600	2-Part plastic kit	10gm (0.35 oz)
164000F00000G	Ther-O-Bond™ 1600	2-Part plastic kit	40gm (1.40 oz)
200000F00000G	Ther-O-Bond™ 2000	Adhesive syringe Activator bottle	25ml 13ml

### Ther-O-Bond™ 1500

Ther-O-Bond™ 1500 is a versatile epoxy casting system developed for high performance, production potting and encapsulating applications where low shrinkage and rapid air evacuation are required. This formulation has a very low surface tension and a flowable viscosity, which affords excellent air release. Ther-O-Bond™ 1500 adheres to rigid plastics and laminates, metals and ceramics, has a low coefficient of thermal expansion and is readily machined and shaped with ordinary shop tools. The fully cured epoxy system is an excellent electrical insulator which provides good resistance to electrolysis, leakage and corrosion room water, weather, gases and chemical compounds.

#### HANDLING CHARACTERISTICS

Mix ratio by weight, resin to hardener:	100 to 15
Mixed viscosity @ 25°C, cps:	1000 - 1500
Work-life @ 25°C	45 Minutes
Gel time @ 25°C	3-6 Hours
Cure schedule @ 25°C	8 Hours
Cure schedule @ 65°C	1 Hour
Cure schedule @ 100°C	0.5 Hour

#### PHYSICAL PROPERTIES

Color	Black
Specific gravity	1.5
Operating temp, °C	-60 to 155
Heat distortion temp, °C	100
Hardness, shore D:	88
Thermal conductivity W/(m·°C)	1.26
Compressive strength, psi	14,000
Dissipation factor,	0.01
Self extinguishing:	yes
C.T.E. (ppm/°C)	25
Tensile strength (@25°C)	9200 psi
Dielectric	800
Shelf life	18 months*

\* Stated shelf life is from date of manufacture. To allow for inventory cycle, product shipped from Aavid will have less than 18 months remaining shelf life. Aavid guarantees a minimum of 3 months remaining shelf life. Please adjust order quantity so all product will be consumed within 3 months of date of shipment.

### Ther-O-Bond™ 2000

Ther-O-Bond™ 2000 acrylic adhesive cures rapidly at room temperature, while providing a repairable, thermally conductive bond.

### Ther-O-Bond™ 1600

For smaller applications, Ther-O-Bond™ 1600 produces a stable, durable, high-impact bond, with good heat transfer characteristics. It is a thixotropic (smooth paste) thermally conductive epoxy system used for staking thermistors, diodes, resistors, integrated circuits and other heat sensitive components to printed circuit boards. This two-part adhesive develops strong, durable, high impact bonds at room temperature, which improve heat transfer while maintaining electrical insulation. Ther-O-bond™ 1600 bonds readily to itself, to metals, silica, steatite, alumina, sapphire and other ceramics, glass, plastics and many other materials because its coefficient of thermal expansion provides a good match for those materials over a fairly wide temperature range.

#### HANDLING CHARACTERISTICS

Mix ratio by weight, resin to hardener:	100 to 5
Mixed viscosity @ 25°C, cps:	33,000
Work-life @ 25°C	45 Minutes
Gel time @ 25°C	3-6 Hours
Cure schedule @ 25°C	8 Hours
Cure schedule @ 65°C	1 Hour
Cure schedule @ 100°C	0.5 Hour

#### PHYSICAL PROPERTIES

Color	Blue
Specific gravity:	2.30
Operating temp, °C	-70 to 115
Hardness, shore D:	90
Izod impact, F1 Lbs/inch of notch	0.49
Thermal conductivity W/(m·°C)	0.85
C.T.E. (ppm/°C)	25
Tensile strength (@25°C)	9200 psi
Tensile lap shear, psi	2900
Dielectric strength (volts/mil)	410
Dielectric constant (1 KHz @ 25°C)	5.9
Dissipation factor, KH@ 25°C	5.9
Shelf life	18 months*

\* Stated shelf life is from date of manufacture. To allow for inventory cycle, product shipped from Aavid will have less than 18 months remaining shelf life. Aavid guarantees a minimum of 3 months remaining shelf life. Please adjust order quantity so all product will be consumed within 3 months of date of shipment.

#### PRODUCT INFORMATION

Color	White
Thermal conductivity W/(m·°C)	0.48
C.T.E. (ppm/°C)	25
Tensile strength (@25°C)	2360 psi
Dielectric strength (volts/mil)	220
Shelf life	18 months*

## Thermalbond™

Thermalbond™ is a thermally conductive, high strength epoxy adhesive. It provides exceptional adhesion to copper, aluminum, steel, glass, ceramics, and most plastics. Thermalbond™ also has a coefficient of thermal expansion compatible with aluminum, copper, and brass, making it particularly well suited for thermally bonding semiconductors and other components to chassis or heat sinks.

### ORDERING INFORMATION

Part number	Net weight
4949G	0.8 oz (25 gram kit)
4950G	1.7 oz (50 gram kit)
4951G	3.5 oz (100 gram kit)
4952G	7.0 oz (200 gram kit)
4953G	4 lbs (1814 grams)

### MIXING INSTRUCTIONS

Mix resin thoroughly before removing material. Add 7.1 parts of RT-7 hardener to 100 parts of resin by weight, or 17 parts of RT-7 hardener to 100 parts of resin by volume. Adhesive will set up in:

24 hrs at 25°C (77°F)	1 hr. at 100°C (212°F)
2 hrs. at 65°C (149°F)	30min. at 130°C (266°F)

Note: For maximum electrical and physical properties, a post cure is necessary. Post cure at room temperature for 4 days or for 4 hours at 93°C (200°F).

### HANDLING CHARACTERISTICS

Typical electrical and physical properties at room temperature with RT-7 hardener

<b>Color</b>	Green
<b>Specific gravity</b>	2.35
<b>Working viscosity</b>	25,000 cps
<b>Thermal conductivity</b>	1.34W/(m °C) (0.77 Btu/hr ·ft· °F)
<b>Thermal resistivity</b>	29.4°C in/watt
<b>Tensile strength</b>	6.34 x 10 <sup>6</sup> Pa (9,2000 psi)
<b>Compressive strength</b>	1.44 x 10 <sup>6</sup> Pa (20,9000 psi)
<b>Bond shear strength</b> aluminum to aluminum, 25.4mm (1") overlap @ 25°C, (77°F)	3.17 x 10 <sup>6</sup> Pa (4,6000 psi)
<b>Thermal coefficient of expansion</b>	24 x 10 <sup>-6</sup> /°C (1.32 x 10 <sup>-6</sup> /°F)
<b>Water absorption, % after 10 days@ 25°C (77°F)</b>	0.20
<b>Hardness, Shore D</b>	86
<b>Volume resistivity</b>	1.0 x 10 <sup>16</sup>
<b>Dielectric strength</b>	59.1 x 10 <sup>3</sup> volts/mm (1500 volts/mil)
<b>Dielectric constant@25°C (77°F) 100KHz</b>	6.1
<b>Dielectric factor@25°C (77°F) 100KHz</b>	0.020
<b>Operating temperatures</b>	-65°C to 155°C (-85°F to 311°F)
<b>Linear shrinkage</b>	0.002 in/in
<b>Shelf life</b>	12 months*
<b>Pot life@25°C (77°F)</b>	2-3 hours
<b>Suggested stripping agent</b>	Miller-Stephenson MS 111
<b>Cleaning solvent</b>	Acetone

\* Stated shelf life is from date of manufacture. To allow for inventory cycle, product shipped from Aavid will have less than 12 months remaining shelf life. Aavid guarantees a minimum of 3 months remaining shelf life. Please adjust order quantity so all product will be consumed within 3 months of date of shipment.

## The Total Integrated Solution for Cooling Electronics®

Aavid Thermalloy has the expertise to design and manufacture cooling solutions spanning the entire range of thermal efficiency and mechanical complexity. The board level products displayed in this catalog represent only a fraction of our capabilities. Most applications require custom solutions, which is why so many leading electronics companies partner with Aavid Thermalloy.

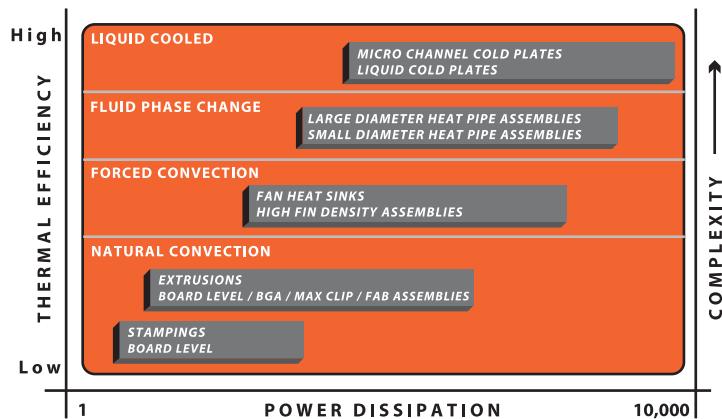

For demanding applications Aavid Thermalloy can design and validate custom innovative solutions utilizing the most advanced engineering resources saving you precious development time. Our manufacturing facilities, located in strategic markets around the globe, deliver cost effective products providing you a competitive advantage. From concept to production, Aavid Thermalloy can enable your design anywhere in the world.

Experts at solving cooling challenges ranging from networking, telecom and consumer electronics, to power and biomedical devices. Our clients include Cisco, Nortel, HP, Apple, Sun, Bio-Rad, Mitsubishi and other industry leading companies worldwide. Utilizing the latest CFD/FEA and experimental techniques we can:

- Perform conjugate analyses with conduction, convection and radiation
- Optimize venting and fan placement
- Increase power density
- Reduce noise, cost and size.
- Increase MTBF

Dedicated thermal engineers characterize your system and provide the most advanced and effective cooling solutions, saving thousands in engineering resources, thermal modeling software, and test hardware.

There are 4 cooling mechanisms that Aavid Thermalloy and Applied Thermal Technologies take pride in having expertise in: natural convection, forced convection, fluid phase change and liquid cooling. The above graph is a starting point to determine which technology can be used for your system configuration.

For more information regarding any of these cooling mechanisms, please contact Aavid Thermalloy at:
